

FACTS

CHICANE

325

A concrete bollard shaped like an ellipsoid cone CHICANE is suited for positioning in various formations and repetitive patterns to restrict access. If a vehicle runs into it, CHICANE will fall over, but its shape will prevent it from rolling and wedge the bollard under the vehicle. Easy to set up and move around due to the moulded lifting threads on the top and hollows for forklifts at the bottom.

Design: GHB Landskabs-arkitekter

TECHNICAL DATA

Standard colours (approx. RAL)

White: RAL 9002

Variant colours (approx. RAL)

Black: RAL 7016

Grey: RAL 7004

Materials

Molded white/black/grey poured, armoured concrete. Highly durable and weather-resistant.

Concrete is a dynamic material. Minor shrinkage cracks may occur over time.

Dimensions

230/600-900 x 1200 mm. Seating height 550 mm.

Mounting

Positions directly on the ground. M16 thread on top. Weight of 0.5 ton eliminates need for mounting.

Maintenance

Maintenance free. We recommend anti-graffiti coating to ensure easy removal of dirt and tags.

Variants

Available in white, grey or black concrete – or dyed to client specifications.

Also available with forklift hollows on the bottom of each unit.

Accessories

M16 steel eyebolts, stainless steel or painted red.
