HOW TO READ THE CATALOGUE

Look for FSC®-certified products on product pages.

The mark of Responsible Forestry.

Play equipment marked with this symbol is designed to meet KOMPAN's inclusive guidelines. It can be accessed and used to varying degrees by all children, including children with a range of disabilities.

QUICK SUPPLY (QS) means that the products are delivered 10 working days sooner than the normal delivery time for standard products.

Bringing communities together

OUTDOOR PLAYGROUNDS AND FITNESS SPACES

A healthy community needs a healthy heart. That heart can be the playground, a focal point for meeting, developing, playing. It is where strangers become playmates and playmates become friends. It is where adults start conversations which become life-long bonds. It is where neighbourhoods are defined and cities established. Playgrounds bring people together without the boundaries of creed, culture or age.

Local pride, trust and love

The playground is a place where embarrassment, fear and unease should melt away in an atmosphere of local pride, trust and love. It is where children put down their electronic toys to become engrossed in activities that require physical commitment and peer-to-peer communication, and in doing so acquire skills that will support them for the rest of their lives. In the fresh air, the children are 100% recharged.

At KOMPAN, we value concepts that are universal in design and purpose, it is our starting point regardless of whether it is for a four-year-old rocking on a Crazy Hen, or a sixty-year-old working out on a cross-trainer. Playgrounds and fitness spaces are central to the well-being of the community, and no more so than when they are combined — side-by-side, children playing while adults, young and old, strive for a new level of personal fitness. It is a healthy life in full circle.

Access is for all, inclusive play

The playgrounds and fitness spaces should be the centre of a broad community. There are no 'exclusive zones' that might isolate or stigmatise. Access is for all, inclusive play. Each playground and fitness space mirrors the needs of those who use it, whether it is to play, to exercise or just sit and watch the next generation evolve.

That is the KOMPAN view of the perfect way to build a community, healthy in body and mind. A community enjoying a bright today with a brighter tomorrow on the horizon.

STAY FACTOR

'Oh no, not yet' is the expression we most love to hear in response to the suggestion to head home. It epitomises the Stay Factor. Each time a play feature is approached, it should be a fresh encounter, open to new interpretation. Fixtures like the Edge 360. From every angle, it promises a different challenge. Crawl inside, into a twisty series of mini caves, go left, go right, go up, go down, and then emerge outside to conquer a rock face, with every movement building dexterity and decision-making. The Stay Factor reflects the most important feature in any sports or play facility, the people in it.

DEVELOP FACTOR

Play is all about fun, well not all. Behind the laughter, and sometimes tears, it is about development; personal, cooperative and competitive. The Develop Factor is the endless mission of the KOMPAN Play Institute experts. These specialists craft ways of developing motor skills, coordination and balance. Intellectual learning is equally vital, with cognitive development, communication, language expansion and understanding of how to turn the germ of an idea into a successful conclusion.

WOW FACTOR

The eyes open wide to capture the full scene, the mouth forms an O, sucking in more air in expectation of action, the legs run wildly in search of adventure. This is the Wow Factor, the moment of arrival at the playground that marks out a KOMPAN design from all others. It satisfies the child's instinctive demand for change, variety and advancement. The constant cry for something new and exciting is only successfully met by triggering that initial WOW.

Play the KOMPAN way

KOMPAN's unique solutions attract more users, make them stay longer, and make them return again and again. Because whatever we develop, we develop together with our users.

WOW, Stay, Develop, three distinct factors that are moulded into every KOMPAN solution and radiantly displayed in the happy faces of each new generation. Play is the open door to the future.

RECORDING CHILDREN'S OUTDOOR PLAY

FOLLOWING & SHARING KNOWLEDGE

2 SCIENTIFIC AND FOCUSED RESEARCH

4 ASKING CHILDREN WHAT THEY WANT

5 TESTING NEW PLAY IDEAS

Much more than just play

AT KOMPAN PLAY INSTITUTE, WE HAVE STUDIED CHILD DEVELOPMENT AND CHILDREN'S OUTDOOR PLAY FOR FIVE DECADES

Play is vital for developing fundamental life skills, be it for a tiger cub or a child. So KOMPAN playgrounds are carefully designed to motivate children to play; to play relentlessly again and again, while developing important life skills and even

friendships. Children need stimulation for their physical, cognitive, creative and social-emotional development. This is why the WOW-Stay-Develop philosophy is in our DNA and in all our playgrounds.

KOMPAN Play Institute is our driver in this; conducting research, making user workshops, developing and testing with users, and making sure that innovative projects represent the KOMPAN play philosophy.

- I With action cameras and movement screening, we study what triggers children to play, and continue playing. Using microphones, we learn what provokes conversation and what is talked about. This makes our products stimulate language and social-emotional skills.
- 2 Science and universities are a major source of our fundamental research and knowledge. We cooperate with universities and draw on this in all product development. The collaboration takes several forms, such as joint industry PhD students.
- **3** To constantly stay on top of new research, KOMPAN Play Institute participates in conferences, building networks to share and gain insight and knowledge.
- 4 Children have a great sense of what motivates them to play and what to play on. Their opinions change as they gradually grow older. We conduct workshops where they share their ideas and give feedback on our newest ideas.
- **5** Prototypes are tested at their earliest stages in order to prove their child and age relevance. This helps fine-tune important basics, like the placing of components and creating interaction in teamwork.
- **6** When children play in their natural setting, and on their terms, they may use play features differently from a laboratory setting. We install prototypes in kindergartens and schools to ensure they have the exact effect that we wanted to achieve.

6 PROTOTYPES IN THEIR NATURAL HABITAT

Universal design

INCLUSIVE PLAY IS AT THE VERY CORE OF EVERYTHING WE AIM FOR

Play is the most captivating thing in a child's life – it is the open door to self-expression and development. At KOMPAN, we encourage all children to go through that door and enjoy the physical, social-emotional and learning benefits of playgrounds.

Inclusive play is at the very core of everything we aim for. The result is universal designs that embrace the needs of all.

In universal playgrounds, all children can play together – with peers, with parents or individually. There is no need for segregated areas, which may have a stigmatising effect

So, when designers turn an original idea into a concept, there is one golden aim, that everyone takes something positive out of a visit to a KOMPAN playground. It is a philosophy that extends beyond the

playground to our fitness designs. Good health, like play, is for everyone.

Of course, as individuals, we are all limited in what we are prepared to do, or can achieve. Inclusive playgrounds and fitness areas cater for that and offer playful ways to reach and pass those limits and perhaps reset the bar, to advance and grow. On a KOMPAN site, everyone can grow, as everyone is included.

"KOMPAN products are designed to be accessible for everyone. That is our philosophy".

OPEN DESIGN

The open design ensures wheelchair accessibility.

What is universal design?

"Universal design" means the design of products, environments, programs and services to be usable by all people, to the greatest extent possible, without the need for adaptation or specialised design.

United Nations' Convention on the Rights of Persons with Disabilities, Article 2, Definitions

PLAY INTERACTION FOR ALL

The transparency of the Galaxy products and the varied ground-level access and activities create centres of play across the play unit. This makes play interaction possible for all, everywhere in the structure.

MULTIFUNCTIONAL

The multifunctional Spinner Bowl can be accessed and used from ground level. The supportive sides make it usable by all: The spinning movement can be started with the child's own body movements or with help from others pushing

HIGHLY INCLUSIVE

The top frame and spacious platform of the Tipi Carousel makes it highly inclusive, supporting a wide variety of body positions: children and adults can sit, lie, or stand while spinning. The seat height eases transfer from assistive devices.

The multilevel activities of the fitness products make them usable for all.

The best solution

OUTSTANDING PERFORMANCE ON ALL PARAMETERS

Most beautiful and timeless play and fitness designs

KOMPAN was born out of art. Half a century ago, sculptor Tom Lindhardt observed children playing on his artistic creations. Tom turned the process full circle to allow playgrounds to become beautiful and timeless, like objects of art. In the succeeding years, the little Homo Ludens figure, the KOMPAN symbol, has become the iconic mark of inventive quality, the logo that says, 'this is the art of playing.'

Read more

Most playful and developing play designs

Children are like snowflakes, externally similar yet singularly different. With KOMPAN design, the diverse elements demanded by children, the thrills of speed, height, the space, the importance of role-play and comradeship, are built into every module. The playgrounds themselves are like snowflakes, clearly recognisable, but always different. Our aim is threefold: to create a WOW reaction that stimulates a desire to stay and, through play physically and mentally, DEVELOP. Read more about this on pages 6-7.

Outdoor fitness that actually makes an impact

Exercise and fresh air, natural partners and the universal formula for feeling good. Today we are aware of the positive results of physical exertion. Our 21st-century lifestyles demand it, but to get it right takes a scientific approach to what to do, how to do it and what to do it on. This is where design meets reality. We collaborate with sports physiologists and physiotherapists as well as universities and sports researchers to make sure we deliver perfect and impactful outdoor equipment.

Tailor-made solutions

We know that our customers are different and want something different from their playground or fitness space: aesthetics, thematisation, age groups, number of children to be able to play at the same time, etc. A theme park may want to make a WOW playground in order to attract children. A school may want a very physical playground in which the children burn energy in order to be able to concentrate during lessons. So our architects, landscape architects and designers tailor solutions to you, your users, your environments and your wants.

Most unique play landmarks by KOMPAN Design Studio

When is a playground not just a playground? When it is one of a kind. KOM-PAN's Design Studio in Berlin creates built-from-scratch playgrounds and fitness areas that are tailored to say something about the community they serve. They are landmarks, as distinctive as a gift of nature or an architectural gem. From Australia to France, from Germany to Singapore, these are unique statements from communities wishing to stand out, ready to make their mark.

Most universal designs that include everybody

Play is the most magical thing in the life of a child. Regardless of physical or mental ability, play is for all. There can be no cordoned-off protective areas. Inclusive play is at the very core of everything we aim for. Play without boundaries where children are so engaged that they're unaware of each other's personal situation. Universal design means a stigma-free playground for everyone. Read more about this on pages 10-11.

Your preferred partner from idea to play can begin

Building a playground may sound as easy as playing, but can be a very complex and complicated process. We are ready to take the burden of your shoulder and be your partner in the process. We help you find the best products and best layout for you, your users and your site. We make sure that the new site is a safe and lovely place to spend hours and hours. We make sure that everything gets to site and on time, clearing the site, digging out for foundations, installing products, laying the safe surfacing, and putting paths, fences, benches, etc.

Highest quality materials

Playgrounds will have to stand the wear and tear of weather and heavy usage. A KOMPAN site looks great for decades to come and requires little effort or maintenance to take care of. Because only that way will users get as many hours of joy as possible. Therefore, we use the highest quality materials that look inviting for decades to come and require the least amount of maintenance. This is also why our warranties are best in class. Over time, that is the best and most economical for everybody. Read more about this on pages 14-15.

Read more and see video

Green and safe

The environment and safety go hand-in-hand on a KOMPAN facility, with one feature frequently complimenting the other. From raw materials to the final product, the ability to generate from recycled resources and then not leave a negative footprint is primary. As is making the playground experience as exciting and daring as possible, stimulating development, without exposing the children to risk. Read more about this on pages 16-17.

Highest quality materials

ENGINEERED TO LAST

Nothing lasts forever. All playgrounds face the trials of weather, use and abuse, and will eventually succumb to the ravages of time. That day can be postponed for a lifetime by using the finest

of materials, the cleverest of designs. Quality costs, but quality also lasts. A simple equation that in the fullness of time pays dividends

Play panels

PANELS are made of EcoCore™ which is a highly vandalism-resistant material and a highly durable and long-lasting material that gives you a playground that will look good for decades. Additionally, EcoCore™ has maximum UV protection that prevents fading in the sun.

Posts

MAIN POSTS are available in three different materials giving you the opportunity to select your preferred look and quality: 1. Impregnated pine wood with in-ground steel footings. 2. Galvanised steel with powder-coated top finish. 3. Colour-anodised lead-free aluminium. All post types are designed to provide long lifetime and low maintenance.

Floors/decks

All DECKS are supported by uniquely designed aluminium profiles with multiple attachment options in order to give you a highly customised playground with your favourite activities. The HPL decks come with a thickness of 18mm, a very high wearing strength and a unique KOMPAN non-skid surface texture.

Galvanised steel

Our STEEL surfaces and steel frames consist of a hot-dip galvanised inside and outside with lead-free zinc according to global safety standards for playground equipment. The galvanisation has excellent corrosion resistance in outside environments and is maintenance free.

Rope

ROPES come with galvanised six-stranded steel wires and a steel core, impossible to wear through. Each strand is tightly wrapped with PES yarn, which is melted onto each individual strand, making the ropes highly wear and vandalism-resistant.

Robinia wood

Robinia wood is a very strong and long-lasting material with a very high level of natural oils. Thus Robinia wood makes very durable playgrounds which are close to maintenance free and able to last for many years.

Warranty

WE HAVE INDUSTRY-LEADING WARRANTIES

LIFETIME* warranty

- · Hot-dip galvanised parts
- Stainless steel parts
 EcoCore™ and other high-density polyethylene (HDPE) panels

15-year warranty

- Robinia wood parts
- · High-pressure laminate (HPL) parts
- · Aluminium parts

10-year warranty

- · Painted surface on galvanised or aluminium metal
- · Pre-galvanised posts with painted top layer
- Electrogalvanised metal
- Solid plastic parts
- Transparent polycarbonate (PC) parts
- Wood-plastic composite (WPC) parts
- · Siberian larch, pine and other wood types
- Stainless steel slides
- Hollow plastic parts
- · Rope & net constructions

5-year warranty

- · Resin-coated plywood parts
- Springs & ball bearing assemblies
- · Graphic print on transparent PC panels
- Concrete parts
- FLEXOTOP safety
- surfacing virgin top layer · Galaxy connection balls

2-year warranty

- Moveable plastic & metal parts
- · Rubber membranes
- · Screens and electronic parts
- FLEXOTOP safety surfacing recycled top layer
- FLEXOTOP safety surfacing base layer
- · Sunshades & sail solutions

* KOMPAN's LIFETIME warranty is in effect for the lifetime of the product until the product is uninstalled and/or taken out of use. In addition, KOMPAN's general terms and delivery conditions apply and supplement this warranty.

WARRANTY COVERAGE

This warranty applies to KOMPAN's products and spare parts for the time periods described for each product type above and with the limitations described in this warranty. The warranty period applies from the date of purchase by the first customer. This warranty covers only defects in materials. KOMPAN's liability under this warranty is limited to repair or replacement of defective products, without charge, at KOMPAN's discretion. Defective electronic components will be delivered and changed by a KOMPAN ICON Professional installer free of

PROPER INSTALLATION AND MAINTENANCE

The warranty only applies if KOMPAN's products have been installed according to the instructions provided by KOMPAN and maintained correctly according to the KOMPAN Maintenance Manual. The warranty for the ICON electrical components is dependent on those products being installed by an ICON-trained and approved installer.

WARRANTY EXCLUSIONS

This warranty does not cover any damage caused by accident, improper care, negligence, normal wear and tear, surface corrosion on metal parts, discoloured surfaces and other cosmetic issues or failures due to misuse or vandalism. Natural changes in wood over time are considered cosmetic issues and are not

NEAR WATER INSTALLATIONS

Products installed in direct contact with chlorinated water or saltwater (Waterparks), or products installed within 200 metres from the shore are not covered by the KOMPAN warranty for any defects caused by corrosion. Special designed products (handled via department for customised products and upgraded to corrosion class C4) installed within 200 metres from the shore will be covered by a 5-year warranty against defects caused by corrosion

THIRD-PARTY SUPPLIED PRODUCTS & SERVICES

KOMPAN provides non-KOMPAN branded products and installation services performed by certified third-party suppliers. This general KOMPAN warranty does not apply to such non-KOMPAN branded products and installation services, which may carry their own warranties. KOMPAN will pass on information on such warranties where possible.

FREIGHT AND WAREHOUSING

Global transport and logistics arranged by KOMPAN appointed forwarder. Products/items are not to be stored outside waiting for installation and must be kept dry at all times

RECYCLED PLASTIC

The KOMPAN EcoCore™ panel, made of layers of HDPE, has many applications in playgrounds and outdoor fitness, such as equipment sides, roofs and seats. It is a highly durable, eco-friendly panel, which is not only recyclable after use, but also consists of a core produced from 100% recycled, controlled material.

NO WASTE

In the workshop, material usage is optimised, and the rest is recycled. For example the cutting-out process of panels is computer generated in order to minimise residue. This, like every offcut of plastic, every speck of sawdust is gathered and recycled.

RECYCLED WOOD

Wood-plastic composite panels are used for our Multi-Use Games Areas. They are made of recycled wood and HDPE. Besides its green profile, the panel has the same texture look as wood, is highly durable and never needs painting or treating with oil.

Let's play green

WE CARE ABOUT CHILDREN WE CARE ABOUT THEIR FUTURE

For a brighter future, we never stop investigating ways to reduce our environmental footprint. In sourcing, every effort is made to use totally sustainable resources or raw materials generated through recycled

waste. In manufacturing, what little waste we have is recycled. In play, 100% safe products are the target and the number one priority.

We are proud to be certified according to the environmental standard ISO14001

Our catalogues use paper from ecological sources

SUSTAINABLE WOOD

Robinia is amongst the most prolific of trees, it is strong and grows rapidly, the perfect partner for our wooden products. Our Robinia supplies come from countries in Europe from plantasustainable forest management. We also offer other types of wood certified by FSC®.

SAFE MATERIAL SURFACES

A great playground interacts with children, and children touch, jump, slide, kick and might even kiss or lick the playground. That is why all surfaces need to be safe. We go beyond the required outdoor playground standards and also comply with the toy standard EN 71-3 for Migration of Certain Elements.

Make your special place come true

KOMPAN DESIGN STUDIO DESIGNS AND CONSTRUCTS UNIQUE LANDMARK PLAYGROUNDS

Across the world, communities and companies want to create landmark locations that bring children, adults and communities together and function as great destinations for visitors. At KOMPAN Design Studio, we understand that our focus on WOW, STAY and DEVELOP is essential when designing and building

landmark playgrounds. The location must be beautiful; but it must also be fun and challenging. Utilising our special architectural and engineering experience and skills at KOMPAN Design Studio and combining this with our KOMPAN Play Institute competencies, we create the most attractive and fun landmark and

destination playgrounds. Playgrounds that children and adults want to stay at, come back to – again and again – and talk about as great destinations to visit.

On the following pages, we invite you to see more about our way of designing as well as examples.

Tailor-made

UNDERSTANDING YOUR DREAM

A school may want a play sculpture that symbolises wisdom and learning.

A local community may want their play sculpture to tell a story about the community, connecting one generation to the next.

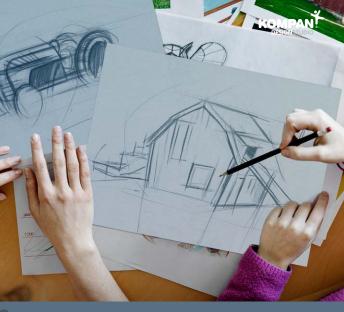

FINDING THE PERFECT CONCEPT

Together we find the perfect concept for your story. For a rural area municipality that wants to signal agriculture, we can decide on the concept of a farm.

Z RESEARCHING THE CONCEPT

Next, the design team will study the phenomena in order to find the features that visualise your story the right way. For a farm, a tractor and a barn are key.

3 SKETCHING DESIGN IDEAS

The first sketches are made and delivered to you in order to test ideas and find the perfect design for you.

FILLED WITH PLAY – FINAL ENGINEERING

Your play sculpture is filled with the portfolio of play features that we have invented throughout half a century. The engineers draw it up to make sure the play sculpture as a structure is safe and sound for the children.

6 THE FINAL PLAY STRUCTURE

Based on the initial idea, created by skilled designers, engineers and craftsmen, the final play structure is now ready for children to come and play for hours and hours.

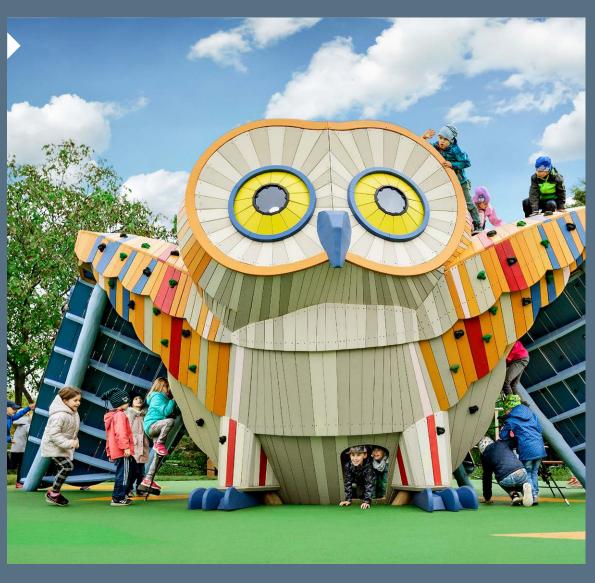

INSTALLATION

The play structure is transported and built on site by our skilled people. Nothing is left to chance or inexperience.

KOMPAN DESIGNSTUDIO

KOMPAN Design Studio in GIANT themes

- Up to 9 metres high, they generate an urge to come and play for hours, even from a distance.
- Climbing inside on transparent panels makes the thrill even higher.
- Come in many different themes, and can be moulded and thematised to your local area and community.
- Made of highly durable and vandalismresistant materials that make them last for decades to come.

JUNGLE GIANT

FACE-TO-FACE FUN
Sitting only centimetres apart, there is no size or generation gap, no limitations as to who can join in the face-to-face fun.

ONE FOR ALL, ALL FOR MORE THAN ONE

Swings have an ageless appeal. The potential for social and physical action attracts teens to more than just play. It's a natural social hangout spot for a chat, a focal point to meet up and play together.

Page 208

Face-to-face, Fun-to-fun

SWINGING TOGETHER ON THE SAME SWING, EYE TO EYE, IS TWICE THE FUN

Sitting face-to-face and hand-to-hand, children get a shared joyful experience and a unique opportunity for social interaction, friendship building and physical activity.

Unlike the traditional swing, getting the swing started takes collaboration. The children need to use their communication skills to coordinate their body movements to get the swing going and establish a rhythm. Once up and running it's the music of laughter all the way.

The Duo Swing is a brilliant stand-alone feature for all ages, but when combined with other swings it opens up opportunities for larger group play and play across ages.

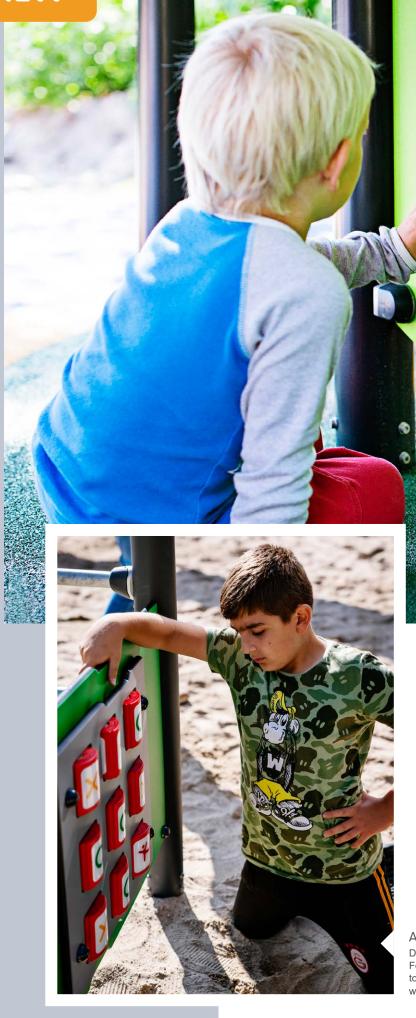

SWINGING WITH RHYTHM

'Pull, stretch, pull... oh wait, we have to do it exactly the opposite to each other!' Children have to use their skills to figure out the technique.

ONE LANGUAGE

One of the great joys of the Duo Swing is that it opens up conversations without words. Facial expressions and laughter go beyond the restrictions of any language.

MADE TO LAST IN THE OUTDOORS

All panels are designed using highly durable materials. Posts are available both in steel and Robinia wood.

AGE-APPROPRIATE PLAY

Different panels target different age groups. For example the tic-tac-toe panel appeals to older children, who train strategic thinking when playing games with rules.

Play anywhere

COMBINE PLAY PANELS ANY WAY YOU LIKE TO MATCH YOUR SITE AND USERS

No space is too small to stimulate play. The freestanding play panels from KOM-PAN can fit in anywhere and are also a great complement to complete the perfect playground.

Instruments, levers, rollers and windows are only some of the tools used to instant-

ly appeal to the children's curiosity and to keep them engaged. Each play activity is carefully designed with responsive and tactile details to stimulate and develop children creatively, cognitively, socially and physically.

EASY TO CONFIGURE

The play panels come in one, two, three or four sections as standard, but the rest is up to you. Through the configurator, you decide the material, colours, shapes and play activities for panels and posts.

TWO-SIDED PLAY

All panels have two-sided activities to encourage children to interact and to increase play capacity.

Page 176-177, 286

Dynamic spinners for nature playgrounds

THREE OF CHILDREN'S ALL-TIME FAVOURITE SPINNERS NOW COME IN A NATURE-LIKE VISUAL EXPRESSION

Every playground needs a great spinner to spin, spin, spin the children to the point of complete dizziness and great FUN! With the addition of three new spinners in the nature play portfolio, nature playgrounds can now also offer iconic spinning fun for children of all ages and abilities.

The three new spinners deliver very different play experiences. In common

though, they have the unique ability to exhilarate children at a level that follows the child's individual age and willingness to be challenged.

The large tilted Supernova ring offers a unique spinning sensation where children can lie, sit or stand. The smallest children can use it seated while their parents give them a spin. Older children find it especial-

ly exhilarating and challenging to stand up on it and to do tricks. The Spinner Bowl is a safe and secure place to settle into and spin to the brink of dizziness. The Tipi Carousel welcomes children of all ages and abilities. The uniquely designed top brace can both serve as support and an element that increases the fun.

The warm nature look allows the new natural looking spinners to blend in perfectly at the popular nature playgrounds.

SIMPLE DESIGN - ADVANCED FUN

The tilted bowl allows children to use their body movement to make the Spinner Bowl rotate – similar to how you get a swing moving back and forth.

GENERATING LASTING PLAY

The strong core of the natural looking spinners will allow them to last a lifetime. These children could very well be bringing their children to the same playground.

The top brace on the Tipi Carousel offers both support and an extra play dimension. Spinning inside – makes the experience less vigorous, but still fun – spinning outside, makes the experience dynamic and challenging. Resistant to vandalism and corrosion. The series is TÜV certified

Page 112-113

Planting imagination

A THEMED OUTDOOR PLAYGROUND UNLOCKS CHILDREN'S IMAGINATION

A WORLD CREATED BY THE CHILDREN

Themed play items intrigue children to create their own little playworld solely fuelled by their rules and imagination. A secret space to grow friendships and communication skills.

Themed play items are a sure hit with children. The real-life inspired features have a magnetic and wondrous effect on them, and the connection with something familiar from the adult world, intrigues all children to explore.

The children immediately recognise the tractor, and in their dramatic play with that theme, it opens an understanding of a wider world: driving, harvesting, working.

All spiced up with a variety of fun climbing, sliding and gliding.

The new Farming family consists of a tractor, a digger and a barn. Three ultimate play starters that fit in to any surrounding and delight pre-schoolers anywhere. The playful and appealing design attracts children, and the many play features inside will keep them playing for hours.

GREAT PROMOTOR OF LANGUAGE SKILLS

As the children play, they practise their language skills to form the adventure they unfold together and give each other verbal guidance on where to take the story next.

Design your own

The Farming family consists of a tractor, a digger and a barn. It's part of a growing selection of real-life inspired play features. If you have wishes for other themes, they can be realised through KOMPAN Design Studio.

WOWING EXTERIOR, ABSORBING INTERIOR

The little play features on the inside, like the steering wheel and gear stick, not only support the theme of a tractor, but also contribute to keeping the children intrigued and playing for longer. The play features have a universal expression, which allows them to be whatever the child interprets them to be.

BUILT TO LAST

The Farming play structures are built on KOMPAN's famous Moments™ platform that has been successfully market tested for more than 30 years.

Page 137, 153

Who dares to jump off the cliff?

CALLING ALL THRILL-SEEKING SCHOOLAGERS!

The new Cliff Rider, the ultimate stimulator of play and community, is here – ready to foster hours of challenging play in school playgrounds and parks across the world.

Imagine standing on a cliff high above ground, stepping on to the ledge and gathering up the courage to leap across a wide gorge to the plateau on the other side! That is the exhilarating play scenario the children face on the Cliff Rider. And they love it!

The activity of pole vaulting is new in the playground scenery. This activity itself is

challenging, but pole vaulting at 2 metres height is extremely challenging. It triggers natural fears like the feeling of height and speed, and mastering body and mind, while impacted by those uncertainties, certainly challenges and develops the children immensely.

While being a great magnet for physical play, the Cliff Rider is also a social gathering point. The different platforms and panels call for a rest and a chat between friends whilst building up energy to go for another ride on the Cliff Rider.

LITTLE SPACE - HUGE FUN

Limited space does not have to mean limited fun. The Cliff Rider takes up little space and is ideal for schoolyards and areas where space is restricted and the demand for play and fun is high.

THE ULTIMATE BOOSTER OF SELF-ESTEEM

Leaping from one platform to the other takes courage. Figuring out how much take-off power is needed to make it to the other side requires reflection in the child and an understanding of gravity and own body.

A PLACE TO PLAY – A PLACE TO BE SOCIAL

The Cliff Rider is a gathering point. Older children with an increasing desire to be social find the combination of action and little hangout spots highly appealing.

PREMIUM QUALITY

CHALLENGING BUT SAFE - TÜV CERTIFIED

The curved take-off plateau is designed with a special non-skid surface, ensuring full control on the plateau. The multiple grip handle allows the child to choose how to best hold on tight.

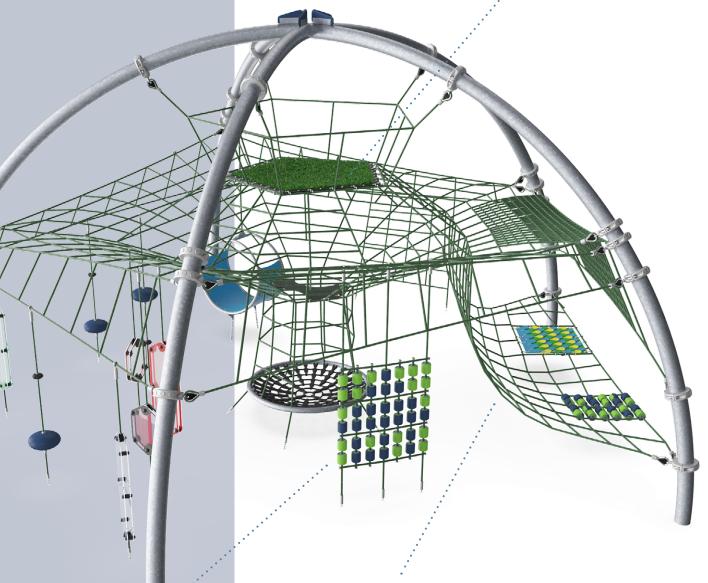

The Cliff Rider is built on the premium quality New ELEMENTS™ platform using only highly durable materials. The series offers a 10-year spare part guarantee.

The grass-covered membrane is soft and fun to touch. Children can lie and feel the relaxation of body pressure in the soft membrane hammock.

CREATIVE AND TACTILE

The drawing wall spheres can be turned to create all sorts of patterns and signals. The feature invites a creative, quiet play break next to the wilder climbing activities. It's ground-level based, so everyone can play.

INTRIGUING CLIMBING

The hugely varied climbs to the top spans both vertical and horizontal movements patterns. This trains the children's spatial awareness, which is fundamental for them navigating the world securely.

SCALES OF PLAY

The dragon scale membrane is a fun-to-feel membrane that arouses the sense of touch and invites a lie down, feeling the relaxation of body pressure amidst the climbing fun.

A world of wonder

TOUCHING, FEELING, SEEING. THE SENSORY DOME IS A PLACE FOR WONDER FOR ALL AGES AND ABILITIES

When entering the Sensory Dome, children step into a world of intriguing climbing and appealing sensory impressions.

The rope mix encourages children to use their body strength and cross-coordination skills to climb in multiple directions. If they climb up to the top, they are rewarded with a rest on the floating island, before continuing around the structure where they will meet sensory play features like optic explorations, creative drawing walls and textured membranes.

The Sensory Dome attracts with its rich mix of sensational, novel play activities. Novelty and richness in variation will make children explore, sense and play for a long time while developing important physical, cognitive and social-emotional skills.

SOCIAL NEST

The nest at ground level welcomes a rest and a tactile experience touching textured membrane

SWAYING POD

The pod calls for a rest while enjoying its calming swaying movement and have a chat with a friend.

WONDROUS FOR ALL ABILITIES

A varied range of ground-level accessible tactile and physical play activities increase play options for all. And it is all so widely spread that wheelchairs and walkers, with children or carers, can pass through.

OPTIC EXPLORATIONS

The moiré effect panels work their mesmerising wonders, creating different patterns depending on the position of the viewer. The explorative journey of why that is enhances children's thinking skills.

GREAT IGNITOR OF CREATIVITY

The Jumpers and the thrilling sensation they give encourage children to release their imagination and use their body in new ways to do tricks and creative jumps.

Jumping for joy

NOTHING QUITE MATCHES THE STOMACH-TICKLING DELIGHT OF BOUNCING, EXCEPT MORE BOUNCING

We see jumpers practically everywhere in society, in amusement parks, public parks and increasingly so in private gardens. The Jumpers' growing popularity reflects just how much children love them, and the developmental benefits they give are tremendous.

Children are master jumpers, and they love it. Jumping is a natural movement, and something children often do when

they are happy or excited. It's a unique form of movement that requires mind and body to work perfectly in conjunction for the all-important control needed to master direction and landing. Add a thrilling re-bounce to their jump with a Jumper and you have the recipe for happy, entertained children.

The KOMPAN Jumpers serve as a premium entertainer and teacher. The

Jumpers give a thrilling response to the child's jump effort, which is highly amusing and motivates them to keep jumping – and keeping them happily physically active. When jumping the child's body and mind get a huge, and unwitting, lesson on balance, bone density and creativity. Innocent fun with paybacks of improved health and development.

REVITALISE YOUR PLAYGROUND

There's always a queue to the Jumper in a playground. Besides being fun, a Jumper also adds a fresh element and the possibility of showing off novel and varied moves.

EASY TO MAINTAIN

The Jumpers are designed with a clever maintenance system that allows you to remove the top panel to conduct maintenance. The jumping bed has tiny drain holes that ensure any water is led away.

BUILT FOR THE OUTDOORS

The KOMPAN Jumper is meticulously designed to last for years outdoors. The springs are made of stainless steel and their fixation points are extra strong. The jumping bed is made of an EPDM rubber membrane that is highly durable. The steel box frame is hot-dip galvanised to prevent corrosion.

AN URGE FOR NOVEL MOVEMENTS

Jumping on one jumper is fun but jumping on multiple jumpers in a row is just pure exhilaration. Place the jumpers in playful patterns and spark the children's creativity. Give the Jumpers different colours and watch how they start play and add an extra layer of fun.

ANYONE CAN JOIN THE PLAY

The new sand play structures have an open design with play activities on multiple levels. Central play activities like the sand hoist, shovels and manipulative elements can be accessed and played with from ground level.

The multifunctional sand hoist encourages hours of cause-and-effect learning where the child grows an understanding of the action it takes and the reaction it gets. Mind-blowing!

Sand play – more than just a good time!

BESIDES BEING SO MUCH FUN, SAND PLAY IS ALSO IMMENSELY VALUABLE FOR THE CHILD'S DEVELOPMENT

As an adult, your mind recognises the sensation of sand drizzling through your fingers and how heavy sand feels in a bucket. But how do you know? Because you've spent hours exploring the wonders of sand as a child, growing your abilities to understand elements like resistance, weight, texture, vibration and temperature.

The new sand structures from KOMPAN offer the joys of sand play with a series

of intriguing play activities. They will encourage children to explore their bodies and senses, and gain insights from play, nurturing the growth of logical thinking, cause and effect understanding and not least cooperation and turn-taking.

Intuitive play activities like the sand hoist, shovels, pipes and little sand mills intrigue children to explore them and work out how they can be used with the sand. Children

need to figure out how to transport the sand up the structure via the hoist and pour it into the pipes, holes and sand mills at the top. A job that's best done in collaboration with friends.

ROOM FOR EVERYBODY

The play activities are evenly placed around the play structure, ensuring that many children can play simultaneously and that every child has a play activity to go to from the inside as well as the outside of the play structure.

BUILT TO LAST

The fascination of sand play lasts forever and the KOMPAN sand play structures will be right there to support it for years to come. The structures are built on a platform that's been reality-tested and proven for more than 30 years.

WEHOPPER

Up, down, fun all around

THE FUN ON THIS LITTLE JOY SPREADER IS SURPRISING AND HIGHLY ADVANCED

Imagine being on a rodeo bull. You're in the saddle, your hands are firmly placed in a good grip and the bull is snorting and waiting anxiously under you. You don't know its next move, but you're ready. The bull is released, and the next thing you know is going up, down and around. In bunking movements where your bottom bounces off the saddle.

The WeHopper is no bull, but it gives the child a rodeo-like play experience - without the danger - but with all the fun, thrills and challenges. Face to face, two friends must collaborate to get the WeHopper going and challenge and negotiate with each other on how high and how wild the ride should be. It is both a cooperation and a contest.

The whimsical WeHopper makes a unique dynamic movement that needs climbing on board to fully understand. It combines turning and seesawing with a re-bounce. The re-bounce effect gives a sense of gravity and control loss and adds immensely to the fun. You can't help but smile and laugh out loud on the WeHopper. Let's WeHop!

Advanced tilt and spinning control

When the WeHopper goes up and down, an advanced tilt control prevents the seat from touching the ground. The specially designed break ensures a controlled turning of the WeHopper with a limited turning speed.

Page 175

THE WEHOPPER COMES IN 2 SIZES

- 4 to 15 years and 3 to 8 years. The play experience is basically the same on the two, however, the degree of thrill and action has been adapted to fit the abilities of the different age groups.

CHALLENGE A FRIEND – AND YOURSELF

It takes two to WeHop. The degree of collaboration and negotiation needed to manage the WeHopper is bound to grow many social skills and friendships.

ALMOST LIKE YOU'RE GLUED ON

Of course the seat doesn't have glue on it, but it feels that way for the children. The ergonomic seat combined with the multiple grip handle creates a unique comfort zone that make the child feel safe and on top of the challenge.

JUMP FOR JOY

On the WeHopper the children are in for quite a joy ride. The double action of turning and seesawing with a rebound at the same time is immensely fun and takes quite a lot of sophistication in motor skills.

WEHOP FOR LIFE

The WeHopper is strong like a bull. It has a hot-dip galvanised steel post and powder-coated top brace, keeping it from corroding outdoors. The bearing system is closed and life-time lubricated, making the WeHopper completely maintenance free.

THE CENTRE OF THE PLAYGROUND

There's always a queue for the WeHopper. Add this new dynamic movement and revitalise your playground.

the play activities to go on your Robinia Mini play structure.

NATURE AT ITS BEST

KOMPAN Robinia wood comes from sustainable forests where new seedlings, eventually growing into mature trees, are planted whenever a tree is felled. You can also get your Robinia wood with an FSC certification, for complete peace of mind.

Robinia is nature's most durable wood material. It thrives in the outdoors and is highly resistant to harsh surroundings and rot. All hardware is made of stainless steel that is extremely durable and will prevent corrosion.

Page 270-271

New toddler universe

BUILT FOR CURIOUS TODDLERS WITH A LUST FOR LIFE

For toddlers, play is how they develop new skills and grow an understanding of the world around them. Robinia Mini is a universe of play, meticulously designed to stimulate the skills toddlers need to succeed in life. The playful universe encourages toddlers to use their motor skills when climbing, crawling and running, their social-emotional skills when cooperating on the double-sided play panel events, harvesting cognitive insights while doing so.

Robinia Mini is built on a tested platform which improved children's communication and language considerably. Thanks to the multiple activities and the defined play unit, children can cooperate, turn-take and not least communicate in a fun, playful and stimulating way.

Robinia Mini is comforting as it meets the toddlers at their level with a play opportunity that is scaled to fit them in size, design

and developmental needs. The Robinia Mini is uncluttered and open to ensure that all children can access and enjoy a totally fulfilling play experience.

OPEN AND INCLUSIVE DESIGN

Robinia Mini is cleverly designed to be open and inclusive allowing all children to join, and just closed enough to give children a sense of space that encourages role play and trains their spatial awareness.

GREAT STIMULATOR OF LANGUAGE

For a toddler, learning to communicate is vital. Exploring the various play activities on Robinia Mini structures intrigues children and increases their use of language as they explore.

Butterfly, spread your wings

THE BUTTERFLY ADDS A NEW DIMENSION TO PLAYTIME, THERE IS NO BEGINNING, NO END

The rope net system offers 3D climbing, rich in training proprioception, coordination and physical growth. The structural twists and turns allow the nets to translate geometric design into complex and tempting shapes that develop spatial awareness whilst opening a world of social fun.

The Butterfly can be set up as a single item or in multiples where each additional frame expands the play potential. The

loops, contracted in the middle to explode into curved-climbing shapes, turns even the simplest of exercises, like navigating round the edge, into a challenge. It is physical and balancing encounter that can be expanded by using rope nets to join to a second loop and then a third and bingo, you have a colourful and complex circuit.

The area under the Butterfly crammed with sensory features. Dichromatic panels give a distorted view of the surroundings or, if you need a break and a chat, then the hanging pods are the perfect social meet-up spot. Just sit, speak and sway.

GEOMETRIC JOY

The neat hooped ladders test muscles and coordination in a stable no-give way, totally unlike the awaiting nets that move with all the activity created by those on top.

Page 220-221

PHYSICAL PLUSES

One of the twisters takes a more physical approach, with the ropes entwined in such a way as to always make every climbing experience slightly different, and training proprioception, coordination and muscle power in the discovery process.

Twisted landmark

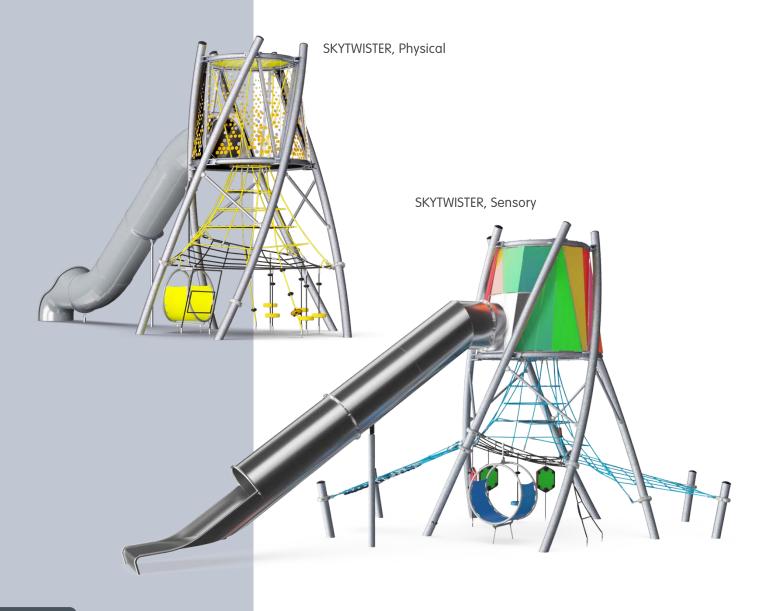

LOADED WITH INNOVATIVE PHYSICAL AND SENSORY PLAY

Imposing and exhilarating, even from a distance, the SkyTwister's five long sweeping legs give the impression of movement and grace. It's like the SkyTwister itself is alive and eager to play.

The colourful dichromatic panels give the SkyTwister a kaleidoscopic look from the outside. Walk around the SkyTwister and watch how the panels react to the different times of day and changing weather.

When looking out from the inside of the SkyTwister, children see the world in all the colours of the rainbow.

The SkyTwister has two looks. One with a colourful top with dichromatic panels and sensory play features at ground level, and the other with a more transparent top and print on the panels, offering physical play features.

PLAY FOR ALL

A varied range of ground level, accessible, tactile, and physical play activities increase play options for all.

RAINBOW PANORAMA

From the top of the SkyTwister children get their own multi-coloured panorama. As they enter the top, some may shiver a bit at first – after all, the only thing separating them from the world below is the colourful glass. Looking out they will see the world in all the colours of the rainbow.

STRIKING - EVEN FROM A DISTANCE

The SkyTwister's imposing design with a mix of sweeping shapes and colours makes it an impressive landmark and gathering point in a community.

THE MASTER OF CARDIO AND FUN

Nothing motivates physical activity more than fun. The exhilarating sensation that follows the dynamic movement motivates users to keep jumping and grow their endurance levels.

The KOMPAN Fitness Jumper enables a high-intensity workout where exercises known from indoor jumping fitness can be conducted. The handlebar offers support for beginners and adds the possibility to do high-intensity power rounds with extra high jumps.

The world's first outdoor Fitness Jumper

The KOMPAN Fitness Jumper is compliant to the EN 16630 Outdoor Fitness Standard and is the first of its kind in the world. A true innovation to the field of outdoor fitness.

Page 335

Fun fitness for all

WHEN BEING ACTIVE IS FUN, GETTING ACTIVE IS JUST EASIER

Over the past 10 years, jumping fitness has become increasingly popular. And the reason for that is quite simple. It's tremendous fun, quickly builds up sweat and gives the body a good workout. Jumping on a bouncing element and using our imagination to do different jumps is mentally liberating and something we all can do. The fun keeps us motivated and entertained and positively drives us to being active for longer time slots.

The new Fitness Jumpers from KOMPAN are designed to be fun, fun, fun – and of course effective and for everybody. When exercising on a KOMPAN Fitness Jumper, you get an intense cardiovascular workout, you train your balance and improve your bone density. The Fitness Jumper challenges both the experienced fitness jumper athlete and the average fitness enthusiast.

BUILT FOR THE OUTDOORS

The Fitness Jumper is made of highly durable materials, allowing them to be highly resistant to wear and tear, weather conditions and vandalism.

A USER MAGNET

Adding on a Fitness Jumper to your fitness site will be sure to attract and retain users. The Fitness Jumper is a novel fitness element that allows variation in the fitness routine and adds dynamic fun.

The Wild Robinia Jungle is designed in a nature look. The gentle, wooden look allows this solution to fit into and enhance any nature setting or even help bring nature into an urban environment. The jungle theme awakens children's natural instinct to play, and soon you will find them swinging in the lianas, balancing on the stepping pods to escape the crocodile or going to hide in The Wizard's Hideaway.

STAY

The versatile play options in the Wild Robinia Jungle keep children occupied for hours on end. The Wizard's Hideaway and Jungle Dome encourage social play where children can interact and make friendships. The springers, swings, balancing pods, Supernova and Jungle Dome encourage physical play where there is plenty of room to burn off energy.

DEVELOP

While the children play and have fun, their skillsets develop from the many different types of play; physical, social and cognitive. Without even knowing, the children train their sense of balance, their cross-coordination and social emotional skills. Many of the activities and the playground layout include children from 2 to 12 years and of all abilities.

The big Castle and the huge Spider's web are something you notice from a distance. They give children a wow feeling and invite them to come and play. The castle with the dragon, the horses and the spider's web are all great motivators of dramatic play.

STAY

The Kingdom includes a wide variety of physical and social play activities, and children can go and find their own favourite. The WeHopper and Spica encourage children to be physical and experience the dizzying feeling from spinning. Two of children's favourites, they can return to time and time again.

DEVELOP

Dramatic play unfolding in the castle stimulates children's imagination, social skills and language development. The Kingdom consists of various educational activities like climbing, rocking, spinning, swinging and bouncing, which develops the children's cross-coordination skills, sense of balance, body strength and stamina. The pathways in gravel surrounding the area make the play accessible for strollers and wheelchairs, so everyone can join the fun.

The Seven Seas is a complete water theme made to bring the notion of water play into parks and urbanity, or to prolong the water feeling from a nearby sea. The Seven Seas theme lets children of all ages explore the wonderful world of water without even getting wet.

STAY

The children can go have fun with the dolphins and their friends on the seesaw and springers or conquer the Seven Seas on board the pirate ship. Or perhaps, they can challenge each other to reach the top first in the Ocean Dome? Whatever activity, one thing is for sure, the variety in the play activities will keep the children absorbed in play for hours.

DEVELOP

The Seven Seas offers play activities for children of all ages and abilities. Physical challenges such as climbing, spinning and swinging strengthen the children's sense of balance, cross-coordination skills and spatial awareness. Skills that will ultimately help children concentrate, be able to sit still and learn to read. Dramatic play in the pirate ship stimulates social and cognitive skills and language development.

The Urban Jungle brings jungle fun into the city. This is where children can swing, climb, slide, cross the ladder, spin, bounce and even sway in the hammock. The big net structure with a 3-dimensional rope universe will attract and retain children of all ages. The Urban Jungle fits well into any urban environment but can also fit into a schoolyard, a park or a camping ground.

STAY

The Urban Jungle offers lots of physical play where children can burn off energy in many different ways: spinning, sliding, climbing, crossing the ladder, line dancing and bouncing. The swings and the hammock also allow for more calm play where children can socialise. The big net structure is also a place to hang out and socialise.

DEVELOP

The Urban Jungle is full of dynamic equipment that will develop children's cross-coordination skills and sense of balance. Skills that will ultimately help the children learn how to read and concentrate at school. The 3-dimensional rope structure encourages children to pay attention to and help each other while climbing. This allows children to grow social skills and develop new friendships.

All products on this solution page come as Quick Supply. See page 3 for more information.

To be an astronaut, one has got to be in great shape. The Space Travel theme calls upon children to come and be physical with spinning on the planets, climbing on the Galaxy structure and meteor, jumping from star to star, doing somersaults on the somersault bars or getting into the seats before take-off from Earth. Who does not want to be an astronaut?

STAY

The many different activities in this design will make, e.g., a schoolyard an active place to play. Not only can it get many children active at the same time, the many social and physical challenges will also keep them active for a long time.

DEVELOP

Physical play is important for developing a good sense of balance, muscle strength, coordination skills and a good health. Yes, the benefits of physical play are many – active children are better prepared to absorb learning and will be able to concentrate better after having burned off a ton of energy. The space travel is a good way to learn about space, the physics of space, gravity etc. As the majority of play takes place at ground level, or close to ground level, children with special needs can be part of the play.

Fairy Tales is a fantasy world full of stories (The Little Mermaid and The Ugly Duckling from the master of fairy tales, Hans Christian Andersen). It invites children to use their imagination and play in the wonderlands of their imagination. With its playful and imaginative design, it can enhance any environment, e.g. parks, schoolyards, pre-schools, camping grounds or theme parks.

STAY

The fairy-tale figures and shapes associate to many different fantasy worlds. It opens up the children's imagination to dramatic play, e.g. being the princess in the tower, the duckling in the water, a bird above the clouds or being the horse who drags the carriage to the castle.

The play equipment is full of interactive play panels to explore and develop fine motor skills at the same time. When energy level gets low, a QR code under the swan takes the child to a digital world in which they can listen to stories or play games.

DEVELOP

Physical play such as sliding, swinging, rocking, riding and spinning develops important physical skills like balance, coordination and strength. The many fairy tales in the playground stimulate children's language development and social skills.

Toddler's Paradise is a safe, scaffolding world of play for toddlers. Shown here in a classic courtyard, but it would also suit a kindergarten, a park or a public square. The playful theme and colours invite children to play. The play equipment is placed on different sides of the "river" which adds an extra layer to the solution. Now you also have to cross the "river" to get back and forth between the different play areas.

STAY

The variation of play equipment provides multiple ways of playing. The playground makes space for social play, role-play and the opportunity to play alone. There are also physical challenges such as the swing, the carousel and the slide but also areas that will stimulate the children's senses. For example, the music instrument and sand and water play.

Benches and edges create the opportunity for parents and grandparents to sit and relax while watching the children play. A playground in a courtyard is also a place where you meet other parents and neighbours.

DEVELOP

Toddler's Paradise is divided into smaller areas, creating different atmospheres for learning. The children develop motor skills by swinging, sliding, balancing and cognitive skills by exploring music, sand and water. Much of the play equipment and the playground solution include children of all abilities.

The old gold mine from the past is still standing. The natural wood material stands as a contrast in the new city and reminds you of the history. This theme fits into all kinds of different contexts.

STAY

The different areas, play equipment and surfaces invite to different activity levels and different play scenarios. This makes the playground challenging for children of different age groups. Dig in the sand and rinse the sand away in the water to find small gold pieces. Edges and sitting areas give parents and grandparents the opportunity to be part of the activity.

DEVELOP

The gold rush theme will teach children history while developing their different physical and social skills. The playground solution is inclusive to children of all abilities.

The pre-school favourite comes in colours that appeal to and attract children in the pre-school age. The happy colours also make the playground a joyful place to be for the kindergarten teachers. The pre-school favourite fits any kindergarten or playground for the 3 to 6-year-olds.

STAY

The large structure holds many different physical challenges such as climbing, sliding, stair climbing and balancing across the bridge. The large Spacenet is full of climbing challenges and offers many different routes up and around the net. Furthermore, the playground offers spinning, rocking and swinging. The large play structure also holds a playhouse which provides a sacred place for social play.

DEVELOP

The play panels at the ground level of the large play structure develop sensory motor skills. The large variety of physical play stimulates both gross and fine motor skills. The playhouse and the shop at the ground level stimulate social and emotional skills as well as language development. And finally, the letters in the surfacing serve as stepping points and provide a platform for learning the alphabet.

The African Safari theme includes a giraffe, an elephant, a gorilla, a zebra and a crocodile in the waterhole. The play structure with the tree house is a hideaway for the safari explorer after swinging in the lianas with the five-way swing and the cableway. The safari theme with its different play activities attracts children from 1 to 12 years old.

STAY

The many different kinds of physical play keep children playing; rocking, balancing, spinning, sliding, swinging and flying down the cableway. The safari theme also stimulates the imagination of the children to imagine that they are on the safari, a place where many things can happen, and this will keep the children playing over and over again. As they grow older and can take up more challenges, the playground can keep them stimulated as the challenges start from the age of 1 year and continue until the children are 12 years old.

DEVELOP

The different animals in the playground stimulate the language development as it is possible to talk about such things as the different names of the animals and the different parts of the animals. There are rocking and sensory play for the youngest and in the other end of the age span, the cable way develops the speed, strength and stamina of the soon-to-be teenagers.

The bell rings and within minutes the schoolyard is packed with children looking to burn energy between lessons. The large two-tower play structure invites children to come and slide, climb and get a full view of the schoolyard. The dynamic play equipment gives children the important dizzying feeling that comes from spinning and swinging.

STAY

The Schoolyard magnet offers numerous play activities, allowing many children to play together simultaneously – and at an age-appropriate level. Children can take on the physical challenge of mounting the tower or go for a quiet time on the bird's nest swing with a friend.

DEVELOP

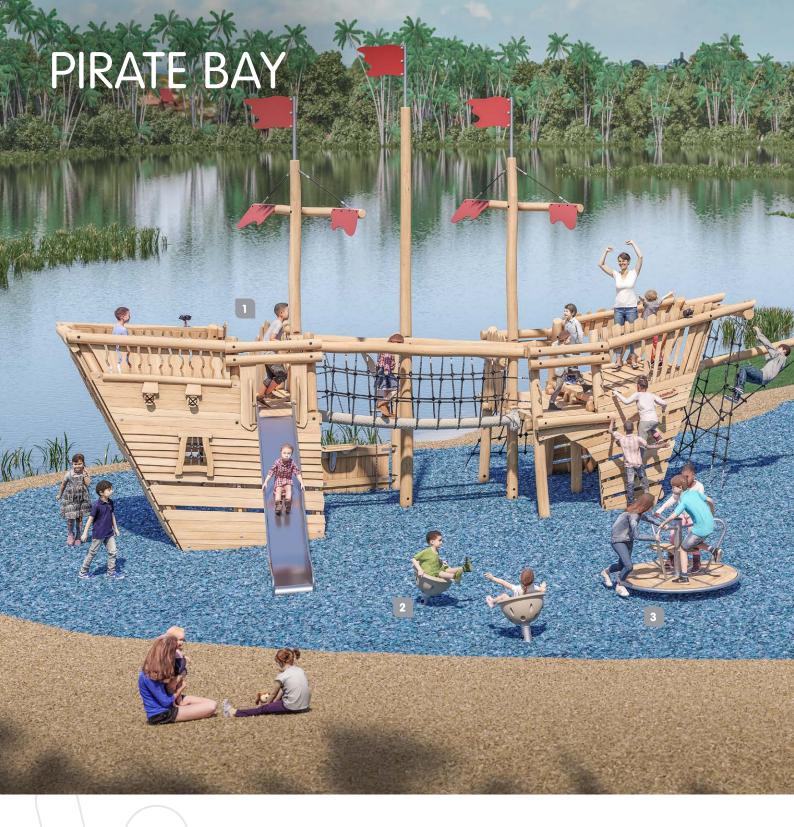

Swinging and spinning are two of children's absolute favourites. It is not only fun, it is also hugely important activities for the child's development. Swinging and spinning train the child's sense of balance and spatial awareness – ultimately helping the child learn to read and concentrate. The large play equipment trains the child's motor skills and body strength.

The pirate ship has been followed by cyclones and dolphins. Now it is entering the harbour of the bay. The sailors have put the boat in the water and set sail towards the small castle and village. On the beach, the inhabitants are ready to meet the sailors. The fantasy of the children can take many forms. The Robinia play structures match many environments. It enhances nature in a park and brings nature to the city.

STAY

The Pirate Bay theme fuels the imagination of children and encourages dramatic play. The many different themed play activities will retain children for hours as they create their own little play story. Pirates, shipwrecked, inhabitants of a secluded village in the jungle... only the imagination sets the boundaries.

DEVELOP

The ship, the towers and the entire playground offer a variety of physical play; climbing, balancing, sliding, swinging, rocking and spinning. All great stimulators for children's physical development. The themed play equipment stimulates the children's social and cognitive skills and the skills need to grow new friendships.

Far out in the jungle lies this never-before-seen Robinia Village. The inhabitants of the village are descendants of the great Robinia tribe. The large two-tower play tower is the heart of the village, on which all children can play and practise their physical skills. The Robinia wood has the ability to blend in beautifully in any natural setting or help bring nature into urban areas.

STAY

Climbing, balancing, spinning, swinging, sliding. The activities just stand in line and wait to get conquered. Children can climb up the play tower and cross the net bridge from one tower to another. Before taking the slide or fireman's pole down, the child can rest in a quiet nook and have a chat with a friend at the meeting point under the shading.

DEVELOP

The Robinia Village combines physical and social play. The large play structures encourage the children to use their body and be active through climbing, sliding and balancing activities. In this, the child grows vital physical skills that are fundamental for learning. The children can meet on the platforms that suits their age and stage of development and interact with each other, ultimately forming friendships and great language and communication skills.

Drawing on familiar connotations like car, train, house, scooter, fire truck, plane, the Traffic School is one big invitation to play for toddlers. The themed play equipment allows the toddlers to learn and explore the world through play.

STAY

There are so many things to try and imaginative plays to be played. Toddlers on the loose in the Traffic School theme are sure to be entertained for hours. Oh, there goes the alarm – fire truck to the rescue! Or, "captain, we're ready for take-off!" before the plane roars down the runway. So many worlds of play await here!

DEVELOP

The themed play equipment allows the children to explore their place in the world and gain their own understanding of the world. E.g. when "driving" the car, toddlers can reflect on situations where they drive the car with their family. By interpreting the situations through play, toddlers become better equipped to handle a similar real-life situation.

Thrill is the key motivator for physical play, and this play area is designed to let children enjoy the many ways of thrill. The new Cliff Rider is immensely fun and thrilling. Imagine stepping on to a ledge, looking down into a deep cliff, and trying to gather up the courage to leap over the cliff to the other side. That's the play scenario the children face on the Cliff Rider.

STAY

The physical challenge offers thrill in different ways. Spinning thrill on the Multi Spinner Carousel, seesawing thrill on the WeHopper, and pushing and gliding thrill on the Cliff Rider. A thrill for every liking and ability. Children can go from one thrill to the next and be absorbed in play for hours.

DEVELOP

Physical play adds to children's physical health by getting them active. While being active, they grow vital physical skills like their sense of balance, spatial awareness and motor skills. Gliding the Cliff Rider takes courage and grows the child's self-esteem. Children need the dizzying input that comes from swinging and spinning as it helps the child's nervous system to mature.

The Robinia Castle universe consists of an impressive castle and a surrounding moat that can only be crossed by the bridge, the line, the balance beam, the water lilies or the island of the spinner plate. Nearby is the mountain, the Tree Climber, where the dragon lives. The attackers of the castle can use the swing set and the seesaw as stone throwers. The Robinia Castle fits into parks and schools or brings nature into the city.

STAY

The Robinia Castle draws children's curiosity and interest in adventure. They can be a soldier whose sole purpose is to defend the crown on the castle, be the knight on the horse who fights the dragon up on the mountain (the Tree Climber) or be the vicious attacker of the foreign castle attempting to cross the moat.

DEVELOP

The physical play of rocking, riding, spinning, balancing, climbing, sliding and swinging develop the children's balance, coordination and agility. Dramatic play in the themed play scenarios develops the children's social skills and stimulates language development.

"Wow, where should I start?!" The enormous versatility in play activities gives children a positive sense of being overwhelmed. Playing here will truly bring out their natural desire to go and explore their body and mind. Children can play in many ways and going from one thrill to the next is just pure wow.

STAY

The play activities are designed to meet any mood or energy level, which allows children to constantly find something to play with. The Creator, the Originator and the Tipi Carousel allow children to climb, bounce and spin and thus burn off energy. The 3-seater Carousel calls for a rest in between play swinging and spinning with friends. The hammock and music panel can give a rest while gathering new energy.

DEVELOP

Jump, climb, crawl, sway, spin, swing. Natural joys for the children and great ways to grow motor skills. This playground is loaded with play that will help keep children active and grow vital life skills. Climbing requires cross-coordination skills, which help develop the brain. Spinning can help children improve mathematical skills.

The amazing, thrilling playscape attracts all ages and abilities with its richly varied, responsive play choice. The graduated play zones support both wild and quiet play types and behaviours, for young as well as older children and tweens.

STAY

Three zones with break areas invite to long stays. KOMPAN's 6 universal design principles guide a playscape inspiring children of all abilities to play and come back:

1. Accessible, inclusive routing, 2. Access to relevant ground-level activities, 3. Access to relevant elevated-level activities, 4. Support thrilling or challenging play, 5. Support social interaction, 6. Variation in play activities.

DEVELOP

The abundance of play choices ticks the boxes for fun stimulation of children's physical, social-emotional and cognitive-creative development. The physical interaction with play equipment and peers support children's life skills, their understanding of the world, their health and happiness, playfully.

GIANTS

Heights that WOW

KOMPAN's new army of GIANTS come at a staggering height of 7 or 9 metres. The tall GIANT towers are filled with physical and cognitive play activities from top to bottom, inside and out, designed to WOW and challenge school-aged children.

The themed exterior with print on the panels adds an extra layer of play by igniting children's imagination and desire to play.

TODDLER MULTIPLAY

The colourful world of toddlers

Playing is how toddlers learn about the world around them. Through play, they try out new skills, explore their imagination and creativity and learn about relationships with other people. KOMPAN's Multiplay for toddlers is designed to help toddlers safely explore and find their place in the world.

The Multiplay structures stimulate the development of vital skills. Familiar themes that they can relate to add a starting point for play conversations. The elevated playhouses provide both a physical climbing challenge and a quiet area underneath to use for a break and a chat with a friend.

STORY MAKERSTM

Inventing a story on the outside and discovering a secret play space on the inside.

Children love a good story. Playing on the structures from STORY MAKERS $^{\text{TM}}$, children get to create and act out their own play story.

STORY MAKERS™ is one big invitation to play. Both motor skills and cognition will be stimulated at high speed. The series offers a two-level play space filled with bright colours, friendly shapes and rounded edges. A gentle and happy look that inspires children to play.

STORY MAKERS™ is as flexible as it gets. You have multiple design options when first designing the playground, and later, the panels can be changed to give the space new life without having to change the entire playground.

FAIRY TALES BY H.C. ANDERSEN

The fairy tales of Hans Christian Andersen: The Little Mermaid, The Ugly Duckling and The Tinderbox inspire play and learning all over the world.

Besides magnetically attracting children to play, the Hans Christian Andersen play equipment is designed to either work brilliantly as standalone play structures, like all other KOMPAN solutions, or as play structures with a virtual, interactive digital layer. No matter the dimension, these fairy-tale structures provide hours of physical and imaginative play.

- age-appropriate physical challenges for the 1 to 8-year-olds
- · a strong basis for language stimulation through role-play
- inspiration for good social conduct through the moral insights and universal truths of the fairy tales (e.g. learning about bullying from "The Ugly Duckling" fairy tale)
- a vast number of digital games supporting learning, edutainment and fun

This way, adults and children alike can share play, learning and cultural experiences in the playground, back home or at school.

MOMENTS™ PIRATE SHIPS

Swashbucklers and buccaneers take notice!

If your playground needs an overhaul and barnacles have settled on your springers, look no further than these amazing new ships from KOMPAN.

Built on a rock-solid structure equipped with a host of adventurous activities both topside and below deck, you will find all you need for children to create their own highseas adventures right here.

MOMENTS™ THEMED PLAY

Harvesting fun

Play is about preparation for life and is at its most forceful in stimulating youthful imaginations when mimicking reality. Themed play opens the door to adventures that would otherwise be 'off limits'.

The thrill of climbing on the giant tractor or digger triggering scenarios of life down on the farm, where the barn is stocked, not with hay, but stacks of endless fun.

MOMENTS™ MINI, **URBAN**

The same flexible play classic with a contemporary and urban look

MOMENTS™ Mini Urban is a variant of KOMPAN's MOMENTS™ Mini Classic. It offers the same flexible features and play value - now with an urban flair. The MOMENTS™ Mini portfolio is age-appropriate in size and scaling, ultimately making it a perfect solution for developing toddlers and pre-school children.

MOMENTS™ Mini features a number of play-based learning panels that stimulate the child's fine motor skills, abstract thinking and emotional development. MOMENTS™ Mini can even come as a fully inclusive solution with ramps and shading.

PRE-SCHOOL TOWERS, **CLASSIC**

Play it your way with MOMENTS™ Play System

The MOMENTS™ Play System allows you to put together a play solution that reflects your ideas. Choose between a large variety of play activities and material options, and your play vision can soon become a reality.

The elevated playhouses give the young children a sense of thrill and add to the fun. Being above ground level also trains the child's spatial awareness. The large decks on the structures allow many children to play together at the same time and develop their social skills.

PRE-SCHOOL TOWERS RAMPS

Include all children with ramps

Install a ramp solution in your local pre-school or community and watch the unique synergy that unfolds when children of all abilities can play together. The ramps ensure that wheelchair users can mount the play tower with their friends and care givers and be an equal part of the play.

Design the solution that fits your needs and change the colours, materials and play activities as you like.

SCHOOL-AGE TOWERS, CLASSIC

$\mathbf{MOMENTS^{TM}\ Play\ System-a\ classic\ look}$

With this unique play system, you can fill your playground with the children's favourite play activities. You simply hand-pick them when putting together your design. The classic design makes this solution suitable for any playground environment.

KOMPAN's school-age assortment is designed to provide age-appropriate play for school-age children. The assortment contains a number of standard products in different sizes, including the challenging Mega Deck play structures that allow numerous children to play together.

The assortment contains new products predesigned to provide easy access for children with disabilities.

SCHOOL-AGE TOWERS,

URBAN

MOMENTS™ Play System – an urban look

The urban variant draws on the flexible MOMENTS™ Play System – the only difference is the urban look. KOMPAN's urban towers can make children happy in any urban playground or be the breath of fresh air in suburban or countryside playgrounds.

With this unique play system, you can fill your playground with the children's favourite play activities. You simply hand-pick them when putting together your design.

ELEMENTSTM TODDLER

Scaffolding the youngest with responsive play solutions

Physical play is essential in scaffolding child development. The new ELEMENTS™ TODDLER series provides a safe world of play activities for the youngest.

The new responsive play activities stimulate the child's motor skills and gently push and motivate toddlers to explore and learn through play. And when they grow confident in their motor skills, children become resilient and self-confident, allowing them to more easily engage in play and interact with friends.

Playing on the ELEMENTS™ TODDLER series will help toddlers develop skills to make them ready for kindergarten, school and life.

ELEMENTS™ GROW

Scaffolding children through agile and exploratory play

New ELEMENTS™ GROW is a world of agile and exploratory play activities that enhance children's holistic development. When playing on ELEMENTS™ GROW, children face age-appropriate physical challenges that gently push their boundaries and help them grow.

The physical challenges develop the child's motor skills, and in doing so, ELEMENTS™ GROW helps the child become more resilient and self-confident when interacting with friends and exploring the world. While on their fun-filled play journey, children can choose to take a break in the little nooks or quietly interact with friends at the social meeting points.

ELEMENTSTM GO

A whole new standard for fun and challenging play

Thankfully, playgrounds don't come with play instructions. Children are inherently curious and masters of innovation. ELEMENTS™ GO is a new series inspired by children and their innovative and creative approach to play.

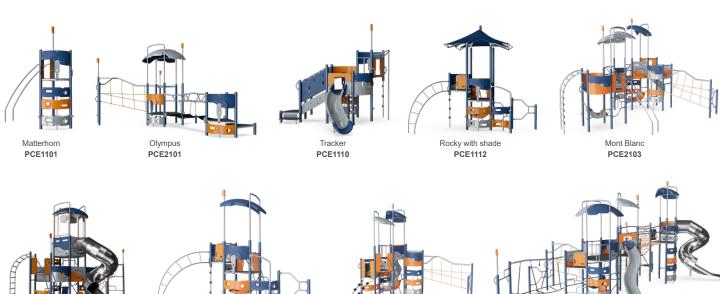

Having observed how children would climb on the exterior surfaces of regular post-and-platform playgrounds in search of new challenges, we were inspired to create structures that would enhance this natural curiosity and stimulate even the most innovative children – we did so in ELEMENTS $^{\text{TM}}$ GO.

ELEMENTS™ GO offers lots of play experiences on the inside of the structure, while more challenging adventures await on the outside. Hence, the same structure provides progressing play opportunities that follow the child's development and willingness to be challenged.

ELEMENTS™ ESSENTIALS

Physical play in premium quality

Sometimes, children need a place to burn off energy and explore their physical abilities through play. ELEMENTS™ ESSENTIALS is all you need to create a fun and physically developing playground for children of all ages.

The series is loaded with physical play that draws on classic play activities like crawling through, climbing up and sliding down, ensuring long playtimes, high physical activity and all-round physical development of the child.

ELEMENTS™ ESSENTIALS

Rooted in premium design

Utilising the same design base as our premium play solution ELEMENTSTM, new ELEMENTSTM ESSENTIALS has adopted a first-class look and premium structure quality, together with a high degree of configuration flexibility.

Besides having the standard KOMPAN premium quality, with the expected attractive warranty conditions, all play structures within the series are available with or without roofs or with a shading solution. Play activities and materials can be modified to fit customer needs.

ELEMENTS™ PRE-SCHOOL

Everything has a play purpose

KOMPAN ELEMENTS™ for pre-school children includes slides, fireman's poles, nets and ladders.

Advanced materials ensure outstanding durability while allowing playful details, such as holes to peek through, finger mazes to feel and follow and washboards to strum on.

A new standard for fun and challenging play with a 360-degree design - we call it ELEMENTS™

Thankfully, playgrounds don't come with play instructions: children are inherently curious and masters of innovation. Hence, we were inspired and made the unique design of ELEMENTS 360 by observing how children would climb on the exterior surfaces of regular post-and-platform playgrounds in search of new challenges.

Our design offers lots of play experiences on the inside of the structure, while more challenging adventures await on the outside. Hence, the same structure provides progressing play opportunities that follow the child's development and willingness to be challenged. This design sets a new and exciting standard for the category, both functionally and aesthetically.

GALAXYTM

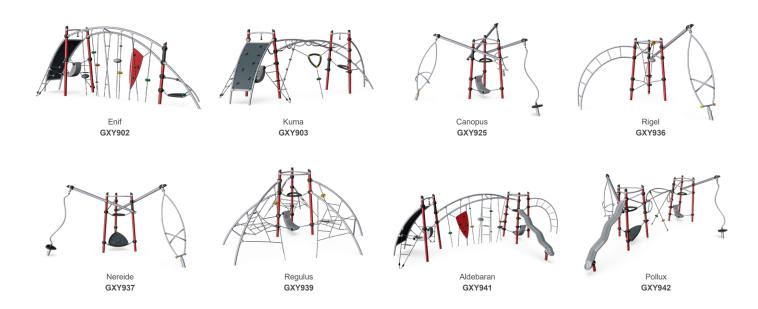

A modern playground giving teens and tweens a reason to play

Teens and tweens repeatedly express that they like to play and hang out in playgrounds. Based on this insight, KOMPAN has designed a series of teen-spirit designs, tested with tweens and teens. No one in the industry really offered fun and excitement for teens and tweens.

GALAXY™ became the world's first solution to move away from the traditional post-and-platform and play tower designs, offering a free-play structure with built-in activities that are responsive and dynamic. It also became the first free-play design to include all people regardless of abilities.

GALAXY™ is often used as a crossover between KOMPAN playgrounds and fitness sites. And because of its beautiful curves and transparent design, GALAXY™ is a favourite with architects and developers around the world and is regarded as the origin of modern playground designs.

BLOQXTM

Multiple challenges in a simple, scalable system

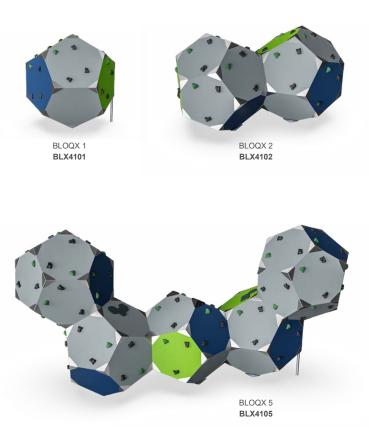

BLOQX™ offers an entirely unique and intense climbing experience. Sometimes exhausting – even for a tween or a teen! That's why the design accommodates rewarding hang-outs on the upper surface of the pentagon shapes.

The BLOQX™ design became a favoured selfie platform, which tells us that BLOQX™ has made its mark with the target group, tweens and teenagers. That's pretty cool.

The sculptural concept behind the BLOQX™ elements makes the design a favourite among landscape architects looking for a solution that complements modern urban spaces.

SPINNERS & CAROUSELS

Spinning is vital in child development

Children need the dizzying input that comes from spinning. These important movement experiences help the child's nervous system mature and organise. And the best thing is that children love it!

KOMPAN's spinners and carousels add innovation to the joy of spinning and attract children of all ages and abilities. Besides being great fun, the spinners and carousels also help children train their sense of balance.

SPRINGERS

KOMPAN invented a new way of rocking, and we have been rocking the world since 1970

This is where it all began: A red hen on a bright blue spring. The Crazy Hen was the world's first play design to deliver a fun and more functional alternative to the traditional seesaw.

And you don't even need a friend – or a counterweight – to get rocking!

SEESAWS

The fun thrill of rocking

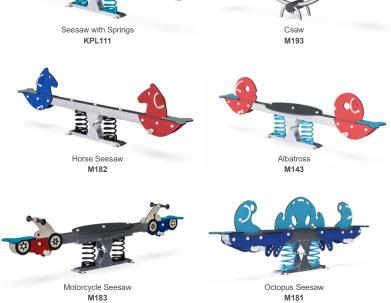

What's better than rocking? Rocking together with a friend! KOMPAN's seesaws add a social dimension to the joy of rocking. Children can rock together and develop their social skills, either in pairs or in larger groups.

Rocking on a seesaw trains the children's muscles and motor skills, their balance and coordination. The fun thrill of rocking, individually, in small or in big groups, will make children come back for more.

The spacious design and sturdy back and foot support allow many children of all abilities to play together. The thrill seekers can securely stand on the middle platform and sense the risk and the movement of the others. The spacious platform also encourages socialising and allow children to lie or sit down. There is enough room for caregivers too.

SLIDES

Speed, thrill and loss of gravity

No matter their age, children love a good slide! When visiting a playground, the slide is often the activity they run to first. Sliding trains the child's sense of balance and their spatial awareness, which among others is important for managing traffic safely. Furthermore, the core muscles are trained when sitting upright sliding down.

KOMPAN's stand-alone slides offer numerous play activities. Whether the children use the slide or play hide and seek underneath it, imagination is the only limit. The high panels offer a great sense of security and form the perfect lookout point. KOMPAN's embanked slides are ideal if you want to reduce the risk of falling.

The play advantage of an embankment slide is the interaction that can occur with friends when going down the very same hill as friends running or climbing up or down.

SAND & WATER PLAY

A vital part of a child's creative and cognitive development

We all know the sensory feeling of sand running through our fingers. Why? Because we've done it so many times as children. Sand and water simply fascinate children, and they can spend hours here, fully absorbed in play.

Besides being fun, playing with sand and water has a huge developmental impact on a child. Constructing things in sand for instance gives the child a sense of success and stimulates the child's creativity.

KOMPAN's sand and water stations encourage children to play together. They learn to take turns and observe how their peers unfold their creativity. KOMPAN's sand and water stations come in many shapes and sizes – common for them all is an appealing look that awakens the curiosity in children.

PLAYHOUSES & THEMED PLAY

Familiar, child-sized spaces in a big world

With their child-scale sizes, KOMPAN's open playhouses are a strong play motivator for the youngest. The open ends and walls widen the play space, making room for many children playing together from both the inside and the outside.

KOMPAN's themed play elements encourage dramatic play in children, which in turn stimulates the child's language development and cognition.

TODDLER EQUIPMENT

A stimulated toddler is a happy toddler

The happiest toddlers are those who experience age-appropriate stimulation and challenges. With KOMPAN's toddler equipment, there's something for even the most energetic toddlers and their developmental needs.

The playful designs draw on familiar connotations and invite the children to engage in dramatic, developmental play. Whether it's climbing the tallest giraffe or driving a pretend car, the KOMPAN toddler universe gently stimulates and guides toddlers on their way to understanding the world around them.

TODDLER STATIONS PATENTED

Themed play stations for play and learning

KOMPAN's toddler stations interpret real-life environments in an age-appropriate size and scale. The toddler stations appeal to the infant and toddler curiosity: lots of details to explore and play at eye level.

The stations stimulate children's learning through play in important domains such as communication and understanding space, shapes and measures. The play panels stimulate the child's creative and cognitive skills, and the opportunity to play from all sides allows children to play side by side.

The toddler stations are placed on top of the surface without fixation in the ground, making it an extremely flexible solution to move around. Place it inside or outside. It's your choice.

PLAY PANELS

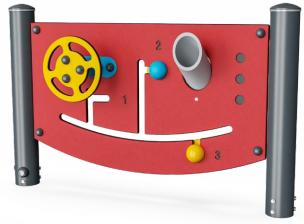

That little extra for fun, play and learning

In free play, children learn by following their natural instinct to play and thereby develop fundamental human skills.

With KOMPAN's play panels, you can add an extra dimension to learning through play. The panels can help you guide the child's learning towards specific learning topics.

The panels allow adults to join the play and guide the children towards learning new things. E.g. through drawing on the chalk-boards, playing together on the music panels or by planting a little seed in the vegetable garden box and follow it as it grows.

KOMPAN's play panels allow you to design your own learning area that fits your vision.

JUMPERS

Jumping fun

Bouncing on the Jumpers is one of the most popular activities in the playground. Children are attracted to the Jumpers' immediate response to their movements, encouraging them to keep bouncing.

The Jumpers' inclined tiles support inclusive play, allowing children in wheelchairs to enter and exit on their own. Choose between circular and square Jumpers or combine them to create a great spot for bouncing, social play for children of all abilities.

BALANCING & CLIMBING

So basic, yet so important

A somersault bar or stepping pods may not look like much. But through fun play, they contribute to child development: jumping pods train children's agility, balance and coordination.

Somersault bars train the child's sense of direction and space. Climbing trains the child's cross-coordination skills. All these motor skills are important for navigating the world confidently and securely, for instance when judging distances in traffic.

CABLEWAYS

The king of fun, thrill and action

The queue for the cableway is always long! Whether you're 4 or 12, the cableway is just great fun.

Besides being fun, the cableway teaches children several important lessons and skills. When playing on the cableway, children are forced to acknowledge and interact with each other. They learn to wait their turn and hand over the seat to the next in line.

KOMPAN's double cableway encourages children to be social and have fun together. Besides being fun, the cableway also holds an aspect of competition. Learning to win and lose in a good manner are important skills for children to master.

MEETING POINTS & ACCESSORIES

Comfortable meeting points for schoolage children

As children grow older, they become more and more interested in social play and social interaction. Hence, comfortable meeting point solutions should be a part of any school playground.

Children can meet in larger groups and have room to play around or just choose to have a quiet meeting with a friend. Whatever they choose, they can either rest on a sturdy bench with a back rest or lie down on a soft, swaying hammock.

PORTAL SWINGS

Swings children keep coming back to

Of all play activities, swinging is a favourite. Whether it's for a quiet moment alone on the swing or being wild in a group of friends, children just love it!

Apart from being great fun, swinging trains children's agility, balance and coordination as well as their spatial awareness. These motor skills are crucial to being able to judge distances and navigate traffic safely.

KOMPAN's portal swings have a stylish look with a powder-coated frame and galvanised top bar.

CLASSIC SWINGS

The classic swing that never grows old

To swing is a classic play activity and so is the design of KOMPAN's classic swings. The traditional look makes it the preferred design in many playground settings.

KOMPAN's classic swings can be constructed with as many sections as you want. All swings in KOMPAN's assortment can be used, and the standard swing seat and baby seat can come with anti-wrap clamps to prevent the chains from turning.

The swings come in two heights -2 metres for pre-school children and 2.5 metres for schoolage children.

COROCORD™ SKY PLAY

Reach for the stars

A Sky Play structure is an entire playground in one play structure. It stands out as a unique landmark and draws attention from everyone around it.

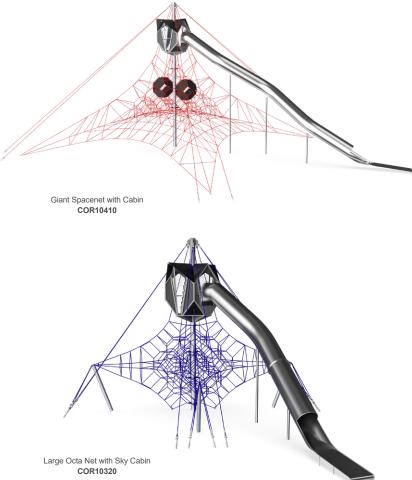

The route to the sky cabin goes through an imposing climbing net. A three-dimensional universe with endless play possibilities that can keep children playing for hours.

At the top of the structures, the adventurous sky cabins await. Here children can climb to safety and get a sense of achievement and self-confidence.

Tree Top Walk COR10470

Play your way to the top

Corocord Play Towers offer a variety of ways to get to the top. Children get the freedom to pave their own way in a manner suitable for their age and abilities. The net structures challenge the children's cross-coordination skills as well as their physical strength. While climbing to the top, children are offered many breaks along the way to say hi to a friend or help each other.

COROCORD™ PLAY TOWERS

Corocord Play Towers leave a very small footprint on the ground, but a very large one on the children.

Going up, the sculptures are packed with surprises and play activities. Each level offers a new colourful world of play, and different climbing challenges need to be solved on the way to the top.

COROCORD™ PLAY TOWERS

The SkyTwister

Even from a distance, the SkyTwister's five long sweeping legs give the impression of movement and grace. It's like it's alive and eager to play.

There are two versions, one crammed with physical challenges and a sensory one, where the dichromatic panels reward the climb up to the tower platform with a colourful panorama before sliding back down to the ground.

COROCORD™ LOOPS

Eye-catchers in any environment

These sculptures draw everyone's attention with their fascinating shapes and bright colours. Children are inspired to play for hours on end, and adults enjoy the aesthetically enticing look while watching their children play.

Sliding, climbing, balancing, crawling, jumping, hopping and dangling. When playing on a Corocord Loop structure, all important skills in child development are sure to be developed.

COROCORD™ LOOPS

PATENT

The Butterfly

Like massive pieces of modern art, the Butterflies, with their bright primary colours and geometrical twists, bring a new dimension to any playtime.

The Corocord™ rope netting highlights the shape of the structure and offers numerous ways of clambering onto and into a spider's web of play opportunities. The three different loops can stand alone or combine into a major feature.

COROCORD™ DYNAMICS

Exploring fundamental forces

Spinning, swinging, bouncing ... Hardly any children can resist the magnetic attraction of these dynamic products. The play structures deliver high-class fun, drawing on the fundamental gravitational and centrifugal forces.

Children need the dizzying input that comes from spinning, swinging and bouncing. These important movement experiences help the child's nervous system mature and organise. And the best thing is that children love it!

COROCORD™ DYNAMICS

Embankment slides & hill-climber ropes

Sliding is a favourite play activity for children of all ages. The play advantage of an embankment slide is the interaction that can occur with friends when going down the very same hill as friends running or climbing up or down. Embankment slides are perfectly supplemented by Hill Climbers.

Hill Climbers provide support and stability when climbing, balancing or running up and down the hill. They are available in adaptable lengths for hill slopes from 20° to 60° .

COROCORD™ DOMES & ARCHES

Lots of wow, lots of play

Corocord Domes are beautiful landmarks and true WOW solutions that offer attraction, exploration and a high play capacity allowing numerous children to play at the same time.

With net layers spanned in between big steel arches, they offer a unique combination of versatile play activities on a small footprint.

The varied physical, cognitive and social challenges that make play and activity appeal to 5 to 12-year-olds are all contained within one framework in the big Corocord Domes and Arches.

COROCORD™ SPACENETS™

Three-dimensional and sky-high play activities

Very few play spaces incite children to move around in all directions like a Spacenet does. It's an adventure into a three-dimensional universe, opening up numerous options for interaction and play activities, like climbing, swinging, sliding, jumping, bouncing and balancing.

The nets can hold lots and lots of children, and parents can trust that climbing in Corocord Spacenets is superior for developing a child's cross-coordination and physical skills in a safe play environment.

COROCORD™ AGILITY NETS

Get in motion!

No other play equipment offers so many different opportunities to get in motion and use mind and body skills as Corocord Agility Nets do. The child has to navigate and find a way through the complex rope jungle.

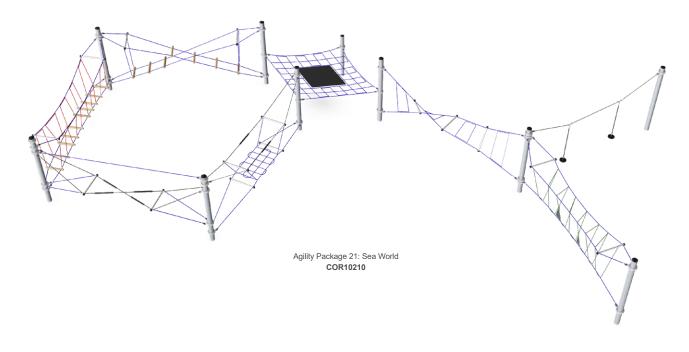

It's a scientific fact that the development of a child's brain at early school age requires complex stimulation.

COROCORD™ EARLY CLIMBING

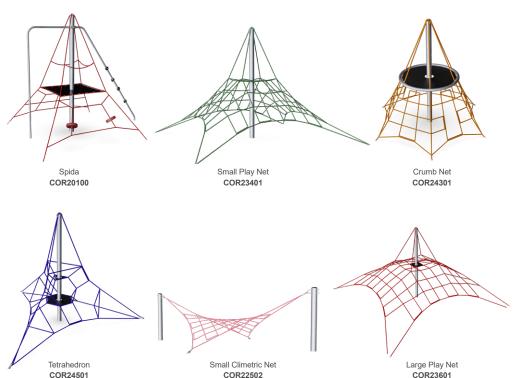

Also fun for the little ones

What makes the Corocord rope so amazing is its flexibility and ability to offer fun for all age groups. Even young, more insecure climbers can get a fun-filled and developmental experience.

Climbing is both fun and an important skill for a child to master. Especially in the younger years. When climbing, the child develops cross-coordination skills, stimulating the two hemispheres of the child's brain and ultimately helping the child learn to read.

COROCORD™ PLAY BRIDGES

Adding a whole new dimension to playgrounds

A bridge in itself is fascinating on so many levels. Imagine a bridge that shakes and bounces when you step on it? And which also has a transparent floor and sides? That's just thrilling!

It takes courage to take steps when up in the air and looking down at the ground. A trip across the bridge boosts the child's self-confidence and trains the child's spatial awareness.

Besides taking the obvious path across the bridge, the more thrill-seeking children can play above or below the bridge. Hang from the bottom of the Rope Net Bridge, or climb on the roof of the Rope Tunnel Bridge – there's no limit!

Small Rope Bridge, 12m COR66120

COROCORD™ FRAME NETS

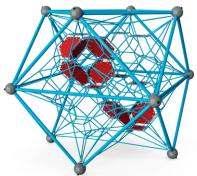

Modernity, geometry and flexibility

The Corocord Frame Nets are KOMPAN's latest innovation in rope play. A marriage between frame and rope technology has resulted in a brand-new system that draws on geometric design while adding a high degree of flexibility.

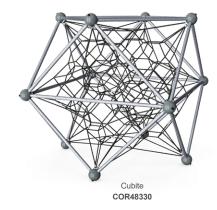

The newest technology facilitates various ways of customisation with the use of membranes, themes and colours. The themes are various – from flowers to dragons.

COROCORD™ FRAME NETS

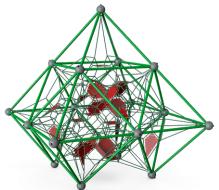

A three-dimensional play universe

The Frame Nets unfold a three-dimensional rope environment in which children can move freely and play in all directions.

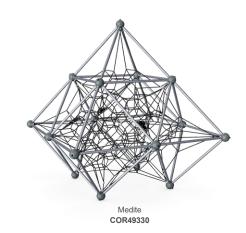

Navigating the Frame Nets' web of ropes encourages logical thinking in the child, and stepping from one rope to the next trains the child's cross-coordination skills and physical strength.

ROBINIA VILLAGE

Create your own Robinia play village and embrace children of all ages

KOMPAN's Organic Robinia product portfolio contains loads of products and play experiences. The product portfolio embraces children of all ages, with spacious playhouses starting from the age of 1 to large, fun-filled play structures for the oldest.

Besides all the fun, Robinia structures add a gentle and calm nature look to the playground and local community. Whether you want your playground to stand out or blend in, Robinia could be your answer.

Robinia can either help bring nature to an urban area, or enhance and blend into a suburban nature area. And who doesn't love the look of nature?

ROBINIA VILLAGE

Toddlers' tactile town

The uncluttered simplicity of Robinia Mini is a magnet for toddlers. The openness of the design is re-assuring, allowing constant eye-contact for both the toddlers and carers as friendships are made in a scaled-down world that is inviting, but also mildly challenging.

The sustainable and durable robinia, with its tight grain, makes each item unique and always warmly tactile.

ROBINIA CASTLES

One big invitation to play

With a Robinia castle, no princess will ever be in distress. Instead, prepare for action and adventures suitable for queens and kings.

A Robinia castle is packed with fun on all levels and floors. Children can let their imagination run wild and explore every little nook and corner.

With its impressive size, a Robinia castle can embrace numerous children of all ages playing at the same time. Playing side by side in an imaginative world helps children develop both social and cognitive creative skills.

ROBINIA SHIPS

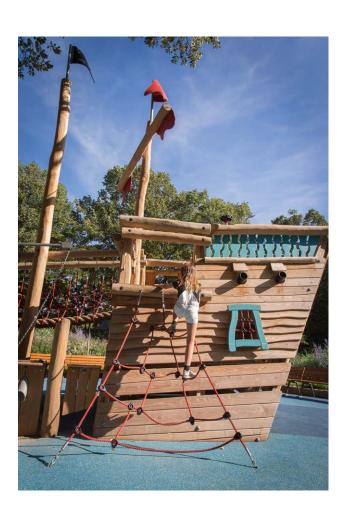

Ahoy! All daredevils and pirates, beware!

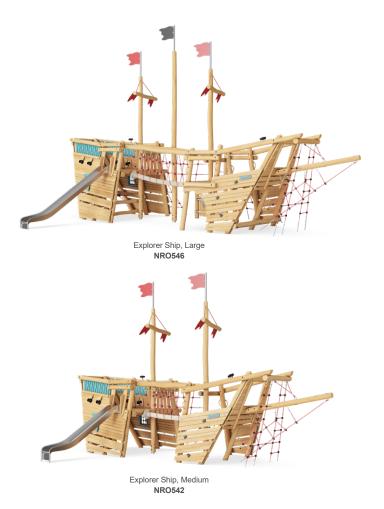

If your playground has been conquered by sea monsters and pirates, then it's time to get everybody on deck and head out to sea.

KOMPAN's Robinia Ships are packed with fun, adventure-creating activities that will inspire children to play and explore for hours on end.

With so much to explore, the play stories are likely to reach beyond the seven seas, and before you know it, you'll be receiving conquered gold coins in return for just five more minutes at the playground.

ROBINIA PLAYHUTS

A cosy play space for the youngest

The new Robinia Playhuts bring something new to KOMPAN nature play by drawing on a classic "house" look.

In other words, the new Playhuts mix the benefits children get from exploring familiar concepts like "house" or "home" through play with the wonders of nature.

Please note that prices and delivery terms depend on specified configurations.

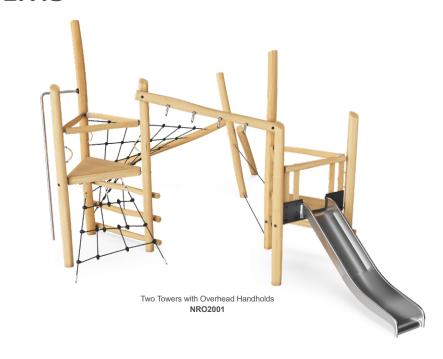

ROBINIA PLAY SYSTEMS

Simple structure, huge play value

The Robinia Play Systems concept draws on the idea of creating huge play value with simple structures.

Rather than using the traditional four poles for a structure, the Robinia play systems for instance keep it simple and only use three. This makes the concept easier to install and reduces the price without compromising on play value and quality.

The Robinia play systems provide challenging physical activities for children of all ages. The many and varied activities – climbing, sliding, balancing, spinning – keep children active for hours. And they'll want to come back for more

ROBINIA OBSTACLE COURSES

Bringing jungle fun to urban areas

A Robinia obstacle course is a challenge that children of all ages and abilities will want to take on. The rich variety of balancing, swaying and climb-and-crawl activities are great fun and a great way of training fundamental physical (e.g. balance) and social-emotional life skills.

A sense of balance is necessary for concentrating and even being able to sit still. When playing 'the ground is lava', children also train skills in turn-taking, consideration of others and cooperation.

ROBINIA SPRINGERS

For the youngest, almost nothing beats rocking

As infants, we are soothed by our mothers' gentle rocking. As we grow, rocking becomes fun. And for the young child, being able to rock on their own is the best part.

Robinia springers allow young children to experience the joy of rocking - either by their own effort or with a friend. Robinia springers are hand carved and come in many adorable shapes that attract children.

Rocking trains a child's sense of balance and spatial awareness - senses that ultimately help the child concentrate and navigate

ROBINIA DYNAMICS

Spinning, sliding, swinging – three vital movements in child development

Children need the dizzying input that comes from spinning, sliding and swinging. These important movement experiences help the child's nervous system mature and organise. And the best thing is that children love it!

The Robinia Dynamics portfolio invites children of all ages and abilities to come and experience the fun feeling of dizziness. Besides being great fun, these activities also help children train their sense of balance, their muscle strength and their bone density.

ROBINIA BALANCING

Simple-looking and complex learning

"The ground is lava!"

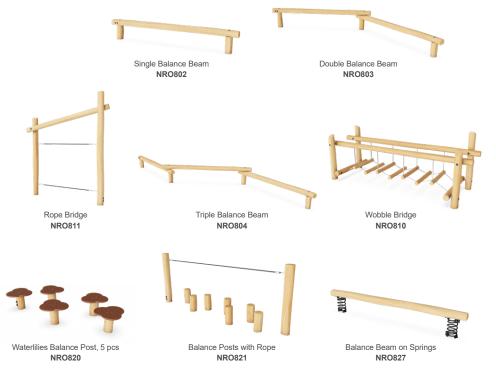

Robinia balancing equipment calls for hours of balancing fun. The children develop some of the most important life skills here without even noticing.

Balancing helps train the child's eyesight and ability to concentrate. Two very basic skills that both improve children's readiness for school and their performance when going to school. A good sense of balance also helps the child be active – skills like kicking a ball or running both draw on the child's ability to balance right.

Robinia balancing equipment can be placed in numerous ways – alone, together or perhaps in a line. Your playground, your choice and your decision.

ROBINIA CLIMBING

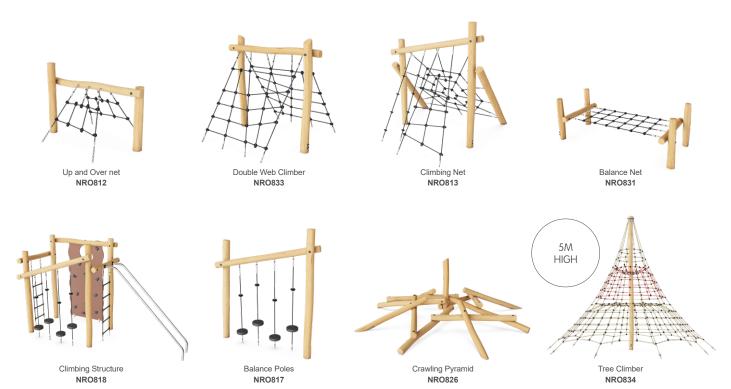

A contemporary climbing tree packed with challenges and fun

We all remember that special climbing tree we loved to visit as children. We loved it, not because it was easy to climb, but because it was difficult. Robinia climbing structures can create the same great feeling for children living in urban areas where trees are few.

When climbing up high, children get a sense of achievement. Step by step, they further build their self-confidence. Along the way, the child also develops fine cross-coordination skills that ultimately help the child learn to read.

ROBINIA PLAY, ACT & LEARN

Adding new play, acting and learning dimensions to nature play

The Robinia Play, Act & Learn series is KOMPAN's new approach to sensory, ground-based play for the youngest children. Serving as an ultimate play starter, Robinia Play, Act & Learn takes children through a sensory and creative world of play with activities that stimulate their cognitive, creative and social skills. The series' high capacity allows multiple children to play simultaneously.

Children get to explore sounds and rhythms with drums and music panels. The chalkboard invites children to practise fine motor skills by drawing or maybe practise writing their first letters or words. The stage encourages role-play and truly helps children release their imagination.

ROBINIA SAND & WATER PLAY

A vital part of a child's creative and cognitive development

We all know the sensory feeling of sand running through our fingers. Why? Because we've done it so many times as children. Sand and water simply fascinate children, and they can spend hours here, fully absorbed in play.

Besides being fun, playing with sand and water has a huge developmental impact on a child. Constructing things in sand for instance gives the child a sense of success and stimulates the child's creativity.

KOMPAN's Robinia sand and water stations encourage children to play together. They learn to take turns and observe how their peers unfold their creativity. KOMPAN's sand and water stations come in many shapes and sizes – common for them all is an appealing look that awakens the curiosity in children.

ROBINIA THEMED PLAY

Full speed on imagination, cognition and language development

The elements within Robinia Themed Play draw on familiar concepts, e.g. a boat, house or gas station, that help children explore the world from a child's perspective and gain an understanding of their own place in the world.

Children tell their play story to each other as they play, which is a great language stimulator.

ROBINIA SWINGS

Swinging – a natural joy

Of all play activities, swinging is a favourite. Whether it's a quiet moment alone on the classic swing or wild play in a group of friends on the bird's nest swing, children just love it!

The Robinia swings fit into any area – suburban, urban or rich in nature. The common denominators for Robinia swings are fun and social play – swing on the same swing, in a circle or side by side.

Apart from being great fun, swinging trains children's balance and coordination as well as their spatial awareness. These motor skills are crucial for being able to judge distances, navigate traffic safely and sit still in school.

SUNSHADES & FURNITURE

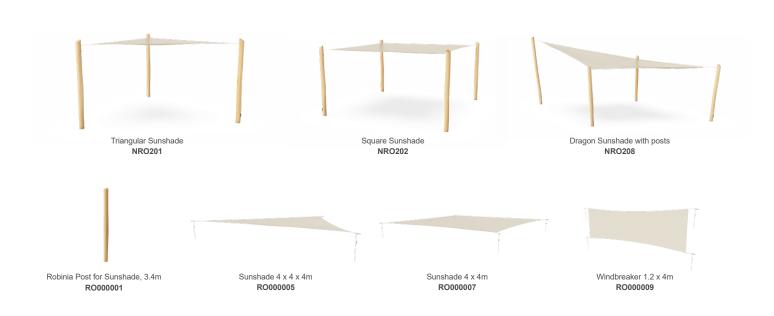

Adding basic value

When playing in sunny areas, children need protection from the sun. A sunshade is a good and secure way to do this. By being able to provide shade for the entire play area, the Robinia sunshades permit hours of outdoor play in the sunniest areas of the world.

When visiting a park or public area, being able to sit down for a rest or to eat and drink is crucial to the park experience. KOMPAN's furniture in Robinia wood blends nicely into any outdoor area. The calm wooden look blends into green areas such as parks and helps bring the gentle touch of nature to urban areas.

NATURE EXPEDITION

Jungle fun meets urban design

KOMPAN's Expedition product line in pinewood brings jungle fun to urban areas.

The series combines the best of jungle fun with the best of the city's modern design. It consists of a beautiful combination of pinewood, steel and curved aesthetics.

A perfect harmony of differences that enhance any urban play area.

WOW

This is an action-packed area in which everyone can work on an active lifestyle. Like the indoor health centres, this outdoor gym has been divided into different areas, tailoring multiple exercise options. Like the high-end, all-inviting, circular cross-training solution, it comes with a full range of cleverly designed cutting-edge equipment. Motivating users of all fitness levels to complete a full workout.

STAY

The street workout area will attract a younger audience, due to the inviting structures that encourage fun and challenging training. Next to the street workout, an elevated platform with 7 sport bikes has been created. The perfect setup for an energising spinning class – one of the most popular indoor fitness classes. By elevating the participants, they can oversee both the instructor and the playground, giving parents the opportunity to keep an eye on their kids who can play for hours in the spacious playground.

DEVELOP

This area will bring the neighbourhood together by inviting everyone to be active and live a healthy lifestyle together.

WOW

The fun element is the motivation that gets people starting over and over again. Outside of pure sport, playful exercise is rare, but obstacle courses create that element.

STAY

This solution is the ultimate obstacle course inspired by traditional military and obstacle course challenges. You will run, jump, crawl, climb, and need to keep your balance.

DEVELOP

What is different to the military version is that you do not need to be super fit to have fun on this obstacle course. All obstacles offer both easy and difficult exercises so that everyone can do a full lap, or several, at their own level and in their own time.

Let's play

WOW

The elegant, curved structures fit perfectly into any environment, be it boulevards, promenades, parks or on top of a skyscraper. This solution requires no safety surfacing and can, therefore, blend in with even any natural setting, such as a park in a city. The exclusive design and organic shapes invite and attract people to come and exercise. And the fact that there is something for everyone, makes it motivating for users of all ages and abilities.

STAY

The bikes motivate people who are out for a stroll to sit down and get started! While they are enjoying the view, they will get their daily dose of cardio training. Strength can be improved with the magnetic bells, beginning with the low weights when they are just getting started or using the heavier weights if they are looking for a challenge.

DEVELOP

By combining the most versatile equipment, the training value is huge, and countless exercise variations can be made. It is a perfect solution for a small space with XL ambitions. Big enough for a complete sports team or a school class, this solution will fit anywhere.

WOW

This outdoor fitness setup is the perfect extension of a sports centre. A mixture of nicely designed free weight systems for crosstraining with the functional, designed obstacle course products. It offers familiar training known from indoor fitness where users can train with products like suspension trainers and kettlebells in a safe and vandalism-proof environment.

STAY

Everybody can participate at their own level due to the smart patented scalable exercise equipment. The obstacle course surrounding the cross-training area can be used independently or in combination with cross-training, adding a lot of value.

DEVELOP

The fun factor is the element that gets people started over and over again. Do it together, do it with your children and let them experience that an active lifestyle is a fun lifestyle. In fact, once you introduce them to the courses, the onus will be on you to keep up.

WOW

One solution to motivate, inspire and activate all generations to work out together.

To increase engagement, we have created a design that will provide a fun, sociable, achievable pastime, which offers relevant short-term benefits while still being challenging after many visits.

STAY

The area is divided into different zones that all focus on different aspects of physical training. The bikes and cross-trainers will get your heart rate up, and with the suspension trainers and free-moving weights you can improve your strength. Your flexibility and balance will be challenged by equipment such as the Balance Board and the Flex Wheel.

DEVELOP

To enjoy all the benefits of physical training, it is important that everyone is working out at their own fitness level, which differs from person to person. The innovative KOMPAN solutions are the only solutions that allow users to adjust the difficulty level of the exercises, making them fun, safe and effective.

WOW

The beautiful garden invites everyone to come and be active at their own level. The equipment blends in perfectly with the flowerbeds which are filled with herbs and flowers to stimulate all senses. The flowerbeds are raised, so they can also be enjoyed by wheelchair users.

STAY

As we advance in life, physical mobility is vital for us. To avoid becoming restricted, we need to keep our bodies mobile and our minds healthy. This solution is designed to promote active and healthy aging and to make injury rehabilitation available outdoors in the public space.

DEVELOP

Falling is a major problem for elderly people. Accidents often occur because the person is unable to overcome or react to minor changes in the surface they walk on. By using the equipment on a daily basis, elderly can improve their balance, endurance, strength and flexibility — and, ultimately, lower the risk of falling.

CROSS TRAINING PATENTED

The open ticket to fitness

Cross-training is amongst the most universal of exercise routines. Participants benefit, regardless of ability or age.

KOMPAN's outdoor training equipment reflects the performance value of indoor apparatus, but it's much more than a case of lifting gear out into the open. That simply wouldn't work. Every piece of fitness equipment has been approached from a fresh angle, de-constructed, re-thought and then built to match climatic and physical demands. Those physical demands echo the realisation that there are individual challenges and are met by equipment that can be adjusted to ensure a valuable rather than sham workout.

The KOMPAN product line, Cross Systems, is not just appreciated by those who work out. In 2017 the system won the Good Design Award in Australia and the European Product Design Award.

CARDIO

Improved ergonomics, improved results

The KOMPAN Cardio family moves some of the more complex indoor gym equipment out into the fresh air and expands its potential by utilising the technology that is in most of our pockets, the smartphone.

There are the two bikes, the City & Sport an arm bike and the Cross Trainer, all giving a different exercise experience. Each variation comes in two forms, with and without a 7" touchscreen. All can connect with your smartphone, opening the KOMPAN Cardio App or other programs to guide or record your progress as you pump your legs to get the heart rate over the necessary 65% target.

The resistance in each piece is adjusted through ten levels from 25 to 750 watts. And yes, you are your own power bank because the systems are completely self-powered.

STREET WORKOUT

Streetwise route to beautiful health

The products in the Street Workout series are outwardly simple but offer a most comprehensive fitness system based on calisthenics. Employing bars of different sizes and formations, position and heights, allows participants to attempt and perfect exercises from pull-ups to the extreme challenge of the human flag.

Led by the unassuming Combi 1 Pro, the system grows through four ever more challenging variations to the fully inclusive Combi 5. Each level is an invitation for personal or social interaction in the name of getting fit.

With calisthenics you bring one of the most vital pieces of equipment with you, your body. Using it as a counterbalance, there are numerous exercises on the parallel, pull-up and push-up bars, benches and the specialist features like the wide overhead ladder and the incline press.

STREET WORKOUT PRO

Training and competition

The new Street Workout Pro is inspired by experts and designed to motivate both professionals and fitness enthusiasts.

The series consists of various combination packages, offering a complete street workout and calisthenics experience.

The users are encouraged to transform their creativity into body art and find their way from one side of the structure to the other.

OBSTACLE COURSES

Survival of the fittest

We used to run, walk, jump, crawl and climb as a natural activity. In the past, it was how we got most things done, through movement. The phrase 'survival of the fittest' was coined from fact, not fiction.

Modern life has married much of our time to a screen and made us more sedentary and eroded our physical activity. Obstacle courses take us back to our roots with natural movement for increased health and happiness. They are a challenge from the moment you start, a contest of you against yourself until you get to the end.

The new modern obstacle course is designed for fun for people of all ages and abilities. It challenges and develops both mental and physical strength. Scalable difficulty levels make it work for young and old and strong and unfit. One obstacle course, one objective, but many routes to get there.

STAY FIT

Stay fit, be mobile

Age is measured in years, but evaluated in mobility. The more physically active you are, the 'younger' you seem to be. The target of Stay Fit is not to train for sports, although participation in physical activity is a major plus. The downward spiral can start not only through inactivity but through even the most minor of physical mishaps.

Trips and falls are the most frequent triggers for injuries. It's universally accepted that three-quarters of fatal and non-fatal accidents involving older people are caused by slipping or stumbling.

We don't use statistics in designing the equipment, we use science. Working closely with university programmes, we study not just what the body does in these autumnal years, but also what the body, with a commitment to fitness, is capable of doing.

Product number	Product name	j	Age (years)	Key user group (years)	Capacity (users)	Fall height (cm)	Total height (cm)	Fall space (m²)	Fall space dimensions (cm x cm)	Installation (hours)

STAY FIT

Functional & flexible for every space

The Stay Fit products which focus on the development of strength and coordination are all created with just one central post to combine two training stations. Therefore, the footprint of the equipment is very low and results in a very high functionality per square metre.

The products can be customised in the product configurator where you can choose from 8 different colours for the central post, and there are also 8 different activities which can combined.

A powerful combination is the FSW238 which combines two of the most used strength exercises, the pull up and leg lift station which can also be used for triceps exercises on a few square metres.

Twist & Flex Wheel FSW236

FITNESS JUMPER

The world's first outdoor fitness jumper

The new Fitness Jumper from KOMPAN is designed to be fun, fun, fun – and of course effective and for everybody.

When exercising on a KOMPAN Fitness Jumper, you get an intense cardiovascular workout, you train your balance and improve your bone density.

The Fitness Jumper challenges both the experienced fitness jumper athlete and the average fitness enthusiast.

X-ERCISE

Easy and intuitive fitness

The classic form of disciplined training that combines strength training with aerobics, targeting all elements of fitness.

Exercises are completed consecutively after a specific number of repetitions or a specific amount of time. At each station, a specific exercise for a specific muscle group is conducted.

When the exercises at all stations are completed, you will know that you are well along the road to becoming fit.

MULTISPORT

WOW

New KOMPAN Multi Use Games Areas (MUGA) are designed as a flexible system to fit any purpose or environment. The intelligent design allows the MUGAs to host many kinds of games like soccer, basketball, hockey, volleyball, tennis, handball, badminton ... the list is long.

STAY

Children will play for hours in the MUGA. The fully flat inside of the MUGAs will keep the ball in play which intensifies the ball game as there are fewer involuntary breaks. And at the same time, children outside the MUGA will not be disturbed by balls flying outside the MUGA.

DEVELOP

Ball sport areas in the school are popular, and both teachers and children are enthusiastic about them. The teachers uniformly say that the pitches have meant more physical activity with fewer conflicts during breaks. The pitches have also had the effect of more concentration and willingness to learn amongst the children in the classroom. And the children? They are just extremely happy to have what is their right – an open invitation to fun and play!

Let's play

AGORA

Full steel

Available in highly vandalism-resistant and durable full steel versions, the AGORA tabletops and seats are made of perforated steel and the frame is in hot-dip galvanised steel, leaving very little need for maintenance.

AGORA

Inclusive design as standard

AGORA PICNIC is a flexible, free-standing furniture set designed to be used by up to 10 persons. The bench and tabletop are made of high-quality larch wood, HPL (high-pressure laminate) or perforated steel. The steel frame is galvanised and optionally powder-coated.

By keeping the sites open, it's easy for wheelchair users to approach the table and be comfortable seated. The PICNIC table is available in two different sizes.

Please note that prices and delivery terms depend on specified configurations.

RUMBA

Contemporary designs for all environments

Square, curved and round shapes designed with low-maintenance materials such as hot-dip galvanised steel and high-quality larch wood.

Natural impregnation of resins makes the larch wood extremely durable and the best choice for furniture in public spaces. The wood does not need to be treated for rot in any way.

FLEXIBILITY

The standard available benches and tables can be dressed up with back support, armrests, tables etc. and linked together into tailored solutions for the individual location. Here are some examples and package proposals for inspiration.

CLASSIC

Classically designed park furniture in low-maintenance materials

Park furniture is an indispensable part of public spaces and KOMPAN has therefore created an assortment of comfortable park furniture that invites citizens to have a seat and relax.

The challenge with park furniture is that it should be visible but also blend into and enhance public areas. Our designs look great along promenades and in town squares, shopping centres and at entrances to buildings.

Safe surfacing with FLEXOTOP™ ECO

FLEXOTOP™ ECO is high-quality wetpour surfacing from KOMPAN. From a safety perspective, this surfacing provides brilliant shock absorption thanks to its two-layer design. Functionality and quality is ensured through TÜV certification according to EN1177 and BS 7188. With FLEXOTOP™ ECO, designers can be very playful, and the children love it. Different colours, shapes and graphics can support and highlight the overall design theme and also extend play from the equipment into the surface. The soft, yet firm surfacing is highly inclusive, making

it possible for wheelchair users to easily access the playground.

From an operational point of view,

FLEXOTOP™ ECO provides a clean and

comfortable surface with very low mainte-

RAL codes are only for guidance – tolerances can be expected

More than 200 prefabricated rubber graphics in 2D and 3D are available to implement directly into the surface. They can emphasise the design theme and increase both play value and learning.

Leveraging the surface to apply patterns for outdoor fitness significantly maximises the training potential by offering more exercise opportunities.

Emphasise the architectural expression of the area with surfacing available in 21 basic colours and several blends.

Colour options

MULTIPLE WAYS OF CUSTOMISING PLAY AND FITNESS SOLUTIONS

Rope colours

For Corocord rope play equipment, we offer eight different rope colours to choose between. The assortment is a wide span of colours ranging from elegant and expressive black or natural and toned-down sand colour, to a range of attractive and eye-catching signal colours.

For exact colours of ropes and membranes, please refer to physical KOMPAN colour samples.

Membrane colours

The popular membranes, which add lot of extra play value to the Corocord play structures, also come in optional colours. Choose between five different colours.

EcoCore[™]

- · Core produced from 100% recycled material
- · Recyclable after use
- Supported by our lifetime warranty

A highly durable, eco-friendly material, which is not only recyclable after use, but also consists of a black core produced from 100% recycled material.

Panel colours

We offer a range of thirteen different panel colours. The assortment is a wide span of colours ranging from elegant and expressive black or natural and toned-down colours to attractive and eye-catching signal colours.

Steel colours

Distinct statements can be made with play or fitness structures adding special colours for the steel. 14 thrilling colours are offered in the standard assortment.
